Notes and Explanations:

- The student not prepared for MAT 1214 (Cal I) must take MAT 1093 (Pre-Cal).
- All Mathematics majors should be aware that some upper-division math courses are offered ONLY once a year or once every two years. It is the student's responsibility to be in touch with the department office and/or advisor to know when a particular course is to be taught.
- All required and elective MAT/STA courses must be completed with a grade of "C" or better.
- A minimum of 126 semester hours is required for graduation, with a total of 39 at the upper-division level. 24 of the last 30 hours must be completed in residence.
- Only one (non-transfer) MAT/STA substitution per student is permitted: only in the student's semester of graduation, and only if the required course is not being offered.

It is understood that all other provisions of the catalog must be met.
