UTSA’s Core Curriculum

The core curriculum is the set of common courses required of all undergraduates at UTSA. While bachelor's degree-seeking students select a major to develop in-depth expertise in a particular area, the common core represents the broad, foundational knowledge and skills that every UTSA graduate should have.

This website is intended to provide UTSA faculty with information and resources needed to (1) submit a proposal for a new course to become part of the core curriculum; and (2) to assess appropriately once a course has become a part of the core.

BECOMING PART OF UTSA’S CORE CURRICULUM

Core Curriculum Proposal Portal (Open February 1-April 1, 2019)

What is the Core Curriculum?

The Texas Core Curriculum (TCC) is a 42 Semester Credit Hour (SCH) core curriculum for all undergraduate students in Texas public higher education. Students gain foundational knowledge of human cultures and the physical and natural world, develop principles of personal and social responsibility, and advance intellectual and practical skills that are essential for all learning and life.

Do I Teach a Core Course? — Get to Know the Foundational Component Areas

Teaching the Texas Core Curriculum Objectives

Each core curriculum course must include either three or four, out of six Core Objectives. These introduce and reinforce skills and knowledge deemed essential to success during college and after graduation. Click the links below to connect with resources for faculty teaching core course.
