Vikhyat Bebarta, MD, FACEP, FACMT
Professor, Emergency Medicine Toxicology
Professor, Pharmacology
University of Colorado School of Medicine
Aurora, CO

Countermeasure development:
designing drugs for chemical disasters

Dr. Bebarta will discuss the risk of chemical disasters in the US, both intentional and accidental. He will also discuss new, novel countermeasures to treat casualties by first responders and bystanders before reaching the hospital and he will share the FDA approval process for these drugs.

Friday, November 18, 2016
9:00—10:00 AM
The University of Texas Health Science Center at San Antonio
Greehey Children’s Cancer Research Institute
Room 2.160
