Student Opportunities at Surveying and Mapping, LLC (SAM)

Blake Williams, MBA, Senior Project, Manager, SAM

SAM provides geospatial data solutions such as land and hydrographic surveying, airborne, mobile, and terrestrial LiDAR, aerial mapping, Geographic Information Systems (GIS), subsurface utility engineering (SUE), utility coordination, building information modeling (BIM), and construction phase services. Founded in 1994, SAM has grown to become one of the largest providers of geospatial data solutions and construction phase services in the United States. Headquartered in Austin, Texas, and employing more than 1,000 professionals, SAM has the capacity to field more than 200 crews with the ability to mobilize quickly, perform reliably, and consistently provide quality deliverables. Combined with a senior leadership team that has more than 450 years of collective professional experience, SAM is uniquely positioned as a highly capable service provider that is continuously prepared to mobilize quickly, perform reliably, and consistently provide quality deliverables.
