

Reverse 911 – Emergency Alert Contacts

When an emergency happens, UTSA wants to be able to contact you. The University wants to give you information on the type of emergency, its location, and protective actions to be taken.

Our Reverse 911 system enables us to rapidly send notifications to all registered students, faculty, and staff in an affected area in the event of an emergency. If phone lines are busy, the system will attempt to redial those telephone numbers to make contact. If an answering machine picks up the call, the emergency message will be left on the machine. If a text message is the preferred means of contact, our system can contact you that way as well.

Please take a moment to fill in this information to enable UTSA to contact you with vital information in the event of an emergency.

Please return completed form in to the UTSA Police Department Front Desk.

Work Location:

What building are you located in for your job?

If you move throughout campus for your job please fill in N/A. _____
