Add Banner to Your Course

You can add a banner image to appear at the top of the course entry point. The banner image is automatically centered.

A recommended size for banners is approximately 480 by 80 pixels. When selecting a banner image, keep in mind that users can resize their browser windows, expand and collapse the course menu, and use monitors of varying sizes and screen resolutions. After you upload a banner, view it under those varying conditions to ensure that it appears as intended.

To add a banner to your course follow the steps below:

1. While you are in your course, click Control Panel > Customization > Teaching Style
2. On Teaching Style page scroll to the bottom of the page to Select Banner section.
3. Click Browse My Computer to select the image.
4. Click Submit.
