Create a Test and Add Questions

You can use tests and surveys to measure student knowledge, gauge progress, and gather information from students. You create tests and surveys and then deploy them in a course area. When you add a test or survey to a content area, it is "deployed."

You assign points to test questions for grading evaluation, but survey questions are not scored.

Survey results are anonymous, but you can see whether a student has completed a survey and view aggregate results for each survey question.

Remind your students that it is best to take tests using a wired connection. Wireless connections are more prone to network issues. The stability of the signal depends on how long and how much bandwidth users draw, similar to 4G phone data connections.

3. On the Tests page, click Build Test on the action bar.
4. On the Test Information page, type a name. Optionally, provide a description and instructions.
5. Click Submit.
6. On the Test Canvas, point to Create Question on the action bar and select a question type.

7. On the Create/Edit page, provide the necessary information to create a question.
8. Click **Submit**.

-OR-

You can add new questions exactly where you want them on the **Test Canvas**. Click the plus sign before or after another question and choose a question type.

9. On the **Test Canvas**, you can change a question's point value.
10. Click a question's current point value.
11. In the **Update Points** pop-up box, edit the points.
12. Click **Submit**.
13. Continue adding questions.
14. Click **OK**. The test is added to the list on the **Tests** page and is ready to deploy in a course area.
