Lab Technician

e9 Treatments, Inc. is seeking a part-time Lab Technician interested in working with the cutting-edge technology of Nano Coatings. In this position you will assist in the development and testing of Nano Coating products developed by e9 Treatments with focus on surface treatments designed to reduce fouling and mitigate corrosion. In this position you will:

- Perform analytical, physical and chemical tests per test plans prepared by the supervisor.
- Document and record all testing activities on standardized forms and daily journal.
- Prepare reports, procedures, graphs and charts as required.
- Prepare test samples and specimens according to the test plans requirements and procedure.
- Research relevant topics and gather information.
- Collect and track control sample data for quality assurance purpose and ensure compliance with quality standards.
- Perform other related duties as assigned including order fulfillment and packaging, inventory supply and sample management, ordering etc.
- Prepare chemical solutions according to standard formulas.
- Ensure adequate laboratory supply inventory and maintains QA and Lab areas clean, organized and safe.
- Participate in continuous improvement projects and executes specials projects as necessary.
- Perform routine maintenance and basic troubleshooting of instruments.
- Adhere to established quality, safety and environmental policies and procedures.
- Conduct method development studies that requires proper data reporting (e.g. Microsoft Excel, Word, etc.) and is able to develop corresponding procedures. Utilize product and process knowledge to interpret data.

REQUIREMENTS

- 1+ year experience working as a lab assistant / research assistant in chemical / material laboratory
- Candidates pursuing BS in Organic / Inorganic / Physical Chemistry or related field
- Knowledge of standard lab safety requirements
- Excellent computer skills with knowledge of MS Office applications (Word, PowerPoint, Excel)
- Accurate and close attention to detail
- Strong analytical skills and communication skills
- Interest or experience in nanotechnology highly preferred

Interested candidates should send cover letter, resume, and salary requirements to jobs@e9Treatments.com or e9 Treatments, Inc. 159 Enterprise Parkway, Boerne, Texas 78006, Attn: HR. Phone (210) 824-5364 or (888) 301-2400. www.e9Treatments.com

About e9 Treatments, Inc.
e9 Treatments, Inc. offers a history of success treating metals to repel organic and inorganic materials in rugged environments. As a spin-off of Electrolab, Inc. (www.electrolabcontrols.com), e9 Treatments grew from Electrolab’s reputation as the leader in providing cutting-edge solutions to material anti-fouling in harsh upstream oil & gas environments with a patented Anti-Paraffin Treatment for stainless steel instrumentation. e9 Treatments provides innovative surface treatment solutions designed to protect key industrial assets. These solutions extend material lifespan, reduce maintenance and cleaning cycles, and improve asset performance, while increasing productivity and improving customer satisfaction.
