Memorandum of support for a Veteran Resource Center

The Student Government Association at the University of Texas at San Antonio supports the development of a Veteran Resource Center. Military affiliated students are an integral part of the community at the University of Texas at San Antonio, making up over 4,000 members of the student population. UTSA does not currently have a dedicated facility to serve our most deserving population. We believe that a consolidated resource center would greatly benefit our military affiliated students. Resource offices, such as the Veteran Certification Office, Veteran and Military Affairs Office, ROTC, and the Student Veteran Association, that specialize in servicing the unique requirements of the military affiliated community would also benefit greatly from a consolidated building.

San Antonio has one of the largest active and retired military populations in the United States earning it the nickname “Military City, USA”. The need for a consolidated resource center continues to rise. Therefore, the Student Government Association hereby supports the creation and development of a consolidated Veteran Resource Center.

Brittany Garcia
President of Student Government Association
