DIVISION OF SOCIAL SCIENCES

The Division of Social Sciences offers bachelor of arts degrees in anthropology, geography, history, political science, psychology and sociology.

At least 36 credit hours of course work are required to fulfill a social science major. The 36-hour total is considered a minimum, and students are encouraged to deepen and broaden their control of their field through careful allocation of some of their elective credit hours.

All social science majors require the student to complete six semester hours of support work. These courses, which require the advisor’s advance approval, should serve to introduce the student to aspects of the social sciences in addition to those entailed in the course work within the student’s major discipline.

At some point in the student’s junior or senior year, one of the several social science (SSC) courses is completed. These interdisciplinary courses typically involve intensive examination of some topic from the perspectives offered by two or more disciplines within the social sciences.

The Division of Social Sciences designates certain of its outstanding students as Honors students and provides the opportunity for advanced study under close faculty supervision.

Admission to the Divisional Honors program is based on performance on a comprehensive examination in the major discipline and recommendation by the faculty of the student’s major discipline. The honors examination, which must be taken prior to the student’s registration for the last two semesters in residence, is open only to students with a minimum grade-point average of 3.50. This minimum grade point average must be maintained for the student to receive Honors. Students admitted to the Honors program are expected to enroll in the appropriate Honors Thesis course during the final two semesters in residence. The completed thesis must be approved by the supervising faculty sponsor and another Divisional faculty member. Students interested in this program should contact their faculty advisors for additional information.

BACHELOR OF ARTS DEGREE IN GEOGRAPHY

At the core of geography are the systems that link man to environment. Some systems are physical; for example, the carrying capacity of regions for the support of human populations, the environmental consequences of pollution, and man's proclivity to distribute his activities according to features of the natural landscape. Some systems are cultural; for example, the spatial layout of cities, cultural attitudes toward time, space and environment, and the role of environment in the founding of civilizations. The primary variable for geography is space; techniques for measuring its range from cartography to attitude surveys to stochastic models and locational theory. The major examines the field of geography and its implications for the use of physical and social space.

BACHELOR OF ARTS DEGREE IN HISTORY

History is the study of the past of human society, as that past is revealed mainly through the analysis of written and oral records. The foundation of historical study is a set of methods for evaluating and interpreting historical sources and a set of attitudes toward the past, whereby non-contemporary societies are regarded as objects of investigation in themselves, as products or prior history, and as the bases from which subsequent change developed. The vastness of the discipline precludes a single standard internal division of the subject; the branches of history may be categorized by geographical region (e.g., American,
European), by era (e.g., medieval, modern), and by the type of human activity upon which the historian focuses (e.g., political, intellectual).

BACHELOR OF ARTS DEGREE IN POLITICAL SCIENCE

Political Science is the study of public decisions, the principles and processes by which, and the structures through which, they are made. It is concerned with the conflict among different social values and interests as they influence and are influenced by the behavior of governments and politicians. Traditionally, political science has been associated with the study of history, law, and philosophy; the contemporary discipline is more closely allied with sociology and economics. These influences are reflected in the diversity of approaches and methods used in the field. Among the major subdivisions of political science are American government and politics, comparative politics, international politics, public law, public administration, and political philosophy.
