Key PeopleSoft Communications for Campus

1. Since Go-Live, it’s been challenging and at times overwhelming.

2. Despite initial hurdles i.e. security, interim processes and familiarization with PeopleSoft, UTSA is collectively making progress with changing to a new system.

3. Now that we are operational with PeopleSoft, we will move to create a smaller User Group to help the UTSA community gain the most value from the PeopleSoft System.

4. Change Leader meeting frequency will be held on an as needed basis but Change Leaders communications will continue.

**Action for Change Leaders**

1. Continue with active outreach in supporting the campus by sharing UTShare/PeopleSoft information and answering questions.
