87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

743 The University of Texas at San Antonio

UTSA is a federally-designated Hispanic Serving Institution with more than 34,500 students, and the largest university in the San Antonio metropolitan region. The university is uniquely positioned to serve society due to its deep integration in a region that reflects the demographic future of the United States. As a prosperity engine and a driver of social mobility for our students and communities, UTSA serves as a thriving research enterprise, generating more than \$1.8 billion in economic impact to San Antonio and the surrounding region.

We took swift, bold steps in response to the COVID-19 pandemic to ensure successful completion of the spring 2020 semester, then quickly pivoted to standing up summer and fall semesters designed to provide students with an uninterrupted, high-quality education. The reconfiguring and realignment of personnel and resources was a testament to our nimbleness and flexibility, and especially to our commitment to our students' success. These actions came at a price, however, leaving UTSA with \$14M in unreimbursed COVID-19 related expenses.

As UTSA looks to the future, we recognize that institutions of higher education (IHE) have always been key to socioeconomic mobility. Now, more than ever, increasing access and success will be essential to ensuring that Texas can recover and emerge stronger. Furthermore, we recognize that due to changing demographics in higher education, all IHEs will need to further engage and serve our historically underrepresented minority (URM) students to meet Texas' 21st century workforce needs.

UTSA has always served as a driver of economic prosperity for businesses and citizens of San Antonio and Bexar County. Triggered by economic fallout from the pandemic, UTSA launched a slate of special programs for San Antonio's unemployed and furloughed workers, including no-cost and low-cost educational opportunities intended to help job insecure individuals sharpen their skills and explore potential new careers.

Our future as a multicultural discovery enterprise and urban-serving institution requires that we graduate world-ready students with the in-demand sought by employers, a core component of UTSA's Strategic Enrollment Plan. Additionally, UTSA has adopted strategies aligned with the 60/30TX Higher Education Plan. This initiative by the Texas Higher Education Coordinating Board aims for 60 percent of Texans ages 25-34 to have a certificate or degree by the year 2030.

Recognizing sound financial practices are paramount to achieving our institutional goals, UTSA follows a highly customized budgeting approach that empowers academic colleges and major administrative units to take greater responsibility for their revenue, expenses and budgetary decisions. Increased transparency into budgetary decisions supports the university's ability to meet its goals. In the coming months and years, revenue growth and cost effectiveness will be key to our success.

UTSA is committed to improving institutional efficiency and productivity while protecting the core academic mission. To meet forecasted budget reductions and ensure the university continues to operate from a position of strength in the months and years to come, we implemented a variety of cost-effective measures to improve services, processes and best align actions with strategic goals. Efforts to automate workflows, digitize paper processes, create business service centers, best utilize technology and streamline financial and administrative practices are already underway.

To complement these efforts, the university continues to explore new and diversified funding sources. Service contracts and subscriptions will be evaluated for opportunities to renegotiate, eliminate or gain economies of scale wherever possible. Course schedules are being optimized to reduce competition without affecting degree completion. Online pedagogy will be leveraged to accommodate increased enrollment.

COVID-19 presented UTSA with the unprecedented opportunity to evaluate how new modes of technology, increased familiarity with ways of connectivity, and engaged and participatory problem solving can provide unique solutions for removing technological, bureaucratic, curricular, territorial, and historical barriers to completion. It also reinforced our commitment to helping all students thrive, especially those students most impacted by past educational practices, systemic racism, and lack of opportunity.

Administrator's Statement

10/22/2020 8:43:08PM

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

743 The University of Texas at San Antonio

We are continually implementing new ways to tangibly demonstrate this commitment in our practices, curricular offerings and pathways.

DESTINATION 1: STUDENT SUCCESS

As a next generation, Hispanic-thriving research institution where students from all backgrounds can excel, UTSA strives to be a model for student success and graduate world-engaged civic leaders of tomorrow. Our dramatic momentum of the last decade to retain and graduate more students continues strong.

UTSA's student success initiatives include:

- Texas Grant Program

The Texas Grant program is especially important for UTSA's first-generation, low-income students, a population often challenged by access and affordability. During the 2019-20 award year, UTSA's allocation was around \$24M, allowing us to award 4,750 students with average grants of around \$5,000. There were 353 additional new students eligible to receive the Texas Grant—for a total of approximately \$1.7M to whom we were unable to offer grants due to insufficient funds. We anticipate providing Texas Grants to the same number of students in the 2020-21 academic year despite a decrease in our funding allocation of approximately \$2M, but we recognize that students will still need to find other resources to help fund educational costs beyond tuition and fees. With a 71% overall retention rate for students in the Texas Grant program, continuation of this funding is critical to grantees' ability to stay in school and graduate.

- Classroom to Career

A key element to preparing students for future success is developing their marketable skills connecting them with job specific requirements. A dedicated initiative is focused on building infrastructure to ensure that—by 2028—75% of our undergraduate students to have some type of experiential learning experience by the time they graduate.

- Enriching Campus Wellbeing

Launched in fall of 2019, this initiative fosters a culture of physical, emotional and social wellbeing at UTSA to provide a healthy environment in which to learn, work and live.

- Expanding Business Education and Career Engagement to the Downtown Campus

An initiative focused on an expanded business-focused presence for UTSA in the heart of downtown San Antonio to enhance career-engaged learning, accommodate rapid enrollment growth and fuel the city's economic development.

- College for Health, Community & Policy

UTSA's newest college designed to transform the way we prepare students for the modern setting of human health related careers, in which physician scientists, nurses, therapists, technicians, social workers, social service and public service workers and policymakers work together to deliver comprehensive solutions that advance local Texas communities.

- Integrated Design Initiative

The task force behind this initiative is exploring potential structures to leverage expertise across the disciplines currently administered by College of Architecture, Construction and Planning and the College of Engineering (COE).

Administrator's Statement

10/22/2020 8:43:08PM

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

743 The University of Texas at San Antonio

- Honors Residential College

This initiative will result in a customized campus life experience for honors students, enabling UTSA to recruit, retain and graduate these talented Roadrunners.

- Graduate Student Success

This initiative, launched in November 2019, enhances the graduate student experience through postdoctoral training, recruitment, funding opportunities, career outcomes and more.

- Preventing Sexual Assault and Misconduct

The President's Initiative on Preventing Sexual Assault and Misconduct cultivates a zero-tolerance environment for all forms of sexual violence and harassment at UTSA.

- 21st Century Learning & Equity Advocacy

Dedicated initiatives focused on fostering healthy and inclusive learning environments, and establishing a framework to provide the UTSA community with the knowledge, tools and skills to engage in serious and productive exchanges of views.

DESTINATION 2: GREAT RESEARCH UNIVERSITY

UTSA is on the fast track to becoming a nationally recognized Hispanic-thriving discovery enterprise. Total research expenditures increased from \$69.7M in FY18 to \$80.6M in FY19, an increase of 15.6%. Based on this momentum and strategic framework, we anticipate a projected growth of total R&D expenditures to exceed \$125 million in FY20, up 55% from the previous year.

Research initiatives include:

- Achieving Carnegie R1/NRUF Eligibility Status

In August 2018, UTSA launched a presidential initiative focused on earning National Research University Fund (NRUF) eligibility, and Carnegie R1 (highest research activity) classification. In support of this initiative, ongoing efforts to increase research expenditures, increase Ph.D. students, hire high quality faculty and pursue faculty awards were reinforced. Our efforts are on track to achieve eligibility in FY21 based on FY20 projections and FY19 results.

- Texas Research Incentive Program (TRIP)

The Texas Research Incentive Program (TRIP) continues to play a vital role in UTSA's efforts toward accessing NRUF and the Carnegie R1 designation. In fiscal years 2019 and 2020, UTSA received total of \$2.34M from TRIP, not only providing additional funds for matching endowments, but also funds to enhance other critical research programs. TRIP continues to be a great incentive in leveraging donor support for research initiatives.

- Cluster Hiring

Growing our research capabilities, UTSA has successfully recruited 41 scholars since 2016 through cluster hiring initiatives in areas related to brain health, cybersecurity, cloud computing, data analytics, artificial intelligence and machine learning. In 2020, UTSA executed its largest cluster hiring initiative to date, recruiting nine new faculty scholars to augment our existing expertise in social and environmental challenges in Latin America, quantum information science and human performance.

743 The University of Texas at San Antonio

- **National Academy Members**

Through the Accelerated Hiring of Nationally Recognized Faculty Program (NRP), UTSA increased its number of National Academy members to five, two within the National Academy of Medicine (NAM) and three within the National Academy of Engineers (NAE), achieving a major NRUF eligibility milestone. Further signifying UTSA's research focus, UTSA is home to four members of the National Academy of Inventors (NAI).

- **Matrix Artificial Intelligence Consortium**

Launched in summer of 2020, the MATRIX AI Consortium for Human Well-Being at UTSA is comprised of diverse local, national and international artificial intelligence and machine learning researchers. This consortium is dedicated to conducting transformative research in the design, use, and deployment of AI to enhance human life.

- **Brain Health Consortium**

The UTSA Brain Health Consortium is a collaborative, multi-disciplinary team committed to discovering the inner workings of the brain. The Consortium integrates researchers with expertise in stem cells/precision medicine, neuroscience, biomedical engineering, psychology and behavior, with the common goal of applying those discoveries to prevent and treat neurological disorders.

- **Tri-Centennial Innovation Park**

This initiative builds on a vision to create an innovation park that leverages the university's key areas of research within San Antonio's burgeoning and diverse local economy. Part of the Campus Master Plan, the proposed park would be a multi-campus development, using a 50-acre tract of land on Main Campus and prospective land located near the Downtown Campus. In summer 2020, UTSA received \$350,000 from the U.S. Economic Development Administration to pursue a feasibility study for site development, governance structure, recommended target partners, needed facilities and future costs of the park.

- **Institute of Texan Cultures**

The Institute of Texan Cultures (ITC), a Smithsonian-affiliated educational center in San Antonio, is dedicated to promoting understanding of the state's varied ethnic makeup. In 2019, UTSA announced an initiative focused on the Institute of Texan Cultures to align ITC collections and programming more closely to the university's academic enterprise.

- **Cybersecurity Manufacturing Innovation Institute & National Security Collaboration Center**

UTSA's Cybersecurity Manufacturing Innovation Institute (CyManII) recently secured a \$70M cooperative agreement from the U.S. Department of Energy (DOE) in FY2020. UTSA's National Security Collaboration Center (NSCC), whose corporate and government partnerships have awarded more than \$10M in grants and contracts since 2018, has harnessed its collective research expertise to secure the highest level of research revenue in UTSA's 50-year history.

- **School of Data Science**

As the first of its kind in the state of Texas, the School of Data Science (SDS) further solidifies San Antonio's status, as the largest information security hub outside of Washington, D.C. Construction of a new building to house the school at UTSA's expanded Downtown Campus is underway with a target completion date of 2023. Six research centers, The National Security Collaboration Center, CyManII, The Open Cloud Institute, The Center of Infrastructure Assurance & Security, The Cyber Center for Security and Analytics, and The Institute for Cyber Security, will be housed in the new building.

- **UTSA's Institute for Economic Development (IED)**

In 2019, the IED served 43,320 existing and aspiring entrepreneurs and generated a total of \$2.7 billion in direct economic impact. In April 2020, the IED launched the Small

743 The University of Texas at San Antonio

Business Development Center COVID-19 Business Recovery Accelerator (SBDC COBRA) to address recovery needs of small businesses. SBDC COBRA is the only recovery accelerator of its kind in Texas to help stabilize and rebuild the small-business economy.

DESTINATION 3: Exemplar for Strategic Growth and Innovative Excellence

- **Strategic Enrollment**

Our future as a multicultural discovery enterprise and urban-serving institution requires that we graduate world-ready students with the in-demand skills employers seek as workforce needs evolve. UTSA's Strategic Enrollment Plan (SEP) charts a path for long-term enrollment growth through data analysis, strategy development, goal development and implementation. A focus of the initiative is on the workforce needs of San Antonio, given our region's emerging industries. Key initiatives within the SEP include:

- o Implementing a robust Customer Relationship Management (CRM) system
- o Using financial aid leveraging to grow enrollment and improve quality
- o Developing collaborative partnerships to build new pathways to UTSA
- o Developing new recruitment strategies to grow and manage prospects and inquiries populations
- o Growing scholarship endowment and programs

- **Entrepreneurial Revenue Generation Tactical Team**

In order to achieve our aspirational goals, UTSA must dynamically increase financial investment across the enterprise in ways that keep relative costs low, does not increase tuition and fees, and is not dependent on competing for diminishing state appropriations. This new ethos looks beyond capital campaigns and philanthropy to creating a more self-sufficient culture and future. The overarching goal of this tactical team is to make recommendations for ongoing operations across the enterprise that inform the analysis of revenue potential, provide a process for the enhancement or creation of revenue generating activities, and create incentive and accountability measures to ensure continuance and growth.

- **Process Efficiency Tactical Team**

To accelerate our progress as a model for student success and great research university, we need to pay close attention to the infrastructure that underpins the ways we operate as an institution. This includes maximizing our limited resources through efficiencies, developing our workforce and reducing logistical barriers for our students, faculty and staff. This tactical team is providing an institutional focus on creating a healthy organizational environment, a modern technological infrastructure and innovative business processes to enable all Roadrunners to excel. Aligning our human, fiscal and physical resources with our strategic goals allows us to direct more university resources toward academic and research success. This initiative will also lead to change—in the way we do business, the way we get our work done, and the way we serve our students.

- **Downtown San Antonio Campus Expansion**

UTSA's Downtown Campus sits at the gateway to San Antonio's near Westside neighborhoods. As such, the university's intentions to expand the campus over the next decade must be informed and influenced by the historical and cultural context of the Westside. UTSA's downtown expansion plans include research on vulnerable people and institutions on the Westside that will be impacted by campus improvements. The intent is to positively impact the Westside community around four key themes: Creating Pathways to Economic Prosperity; Creating Pathways to Educational Excellence; Community-Based Research, Sustainable Partnerships and Advocacy; and Fostering Community-Campus Engagement.

743 The University of Texas at San Antonio

UTSA'S LEGISLATIVE PRIORITIES – REQUESTS ABOVE THE BASE LEVEL

To strengthen the state's ability to respond to the pandemic and economic recession, UTSA is requesting funding for the following initiatives:

RESTORATION: 2022-23 BASE REDUCTION

Annual funding \$428,413/year

Performing our core mission is more critical than ever before in light of the pandemic and the upcoming years of recovery. Restored funds will allow us to meet our greatest need right now and protect our core mission to produce workforce talent, generate new knowledge and serve the community. Not only will restored funds help us to overcome the impacts of the pandemic, but they will allow us to focus on specific priorities identified by the University of Texas System, including student success, increased access and innovation, and effective delivery of our services.

CYBERSECURE ADVANCED MANUFACTURING FOR TEXAS (NEW)

Annual Funding Request: \$2,500,000/year

Cybersecurity attacks are threatening advanced technology and manufacturing companies essential to the Texas and San Antonio economy. The U.S. government is adopting Cybersecurity Maturity Model Certifications (CMMC) which will be required for all U.S. manufacturers within three years. Texas manufacturers and businesses are at enormous risk of not being able to meet these certification requirements if they are not proactive. Companies that struggle to understand and meet these requirements will experience difficulties in securing government contracts, ultimately impacting their financial sustainability. UTSA will use its two cybersecurity powerhouses, the Cybersecurity Manufacturing Innovation Institute (CyManII) and the National Security Collaboration Center (NSCC) to launch the Cybersecure Advanced Manufacturing for Texas Initiative. This new initiative will assist Texas manufacturers to get certified and improve their cybersecurity posture, train their workforce, and expand their global competitiveness. This special initiative focuses on Texas manufacturers and businesses and represents a unique opportunity to leverage CyManII, funded by a \$111M federal award from the U.S. Department of Energy, to offer Texas manufacturers the necessary training, expertise, and advanced cybersecurity knowledge to meet CMMC requirements.

SAN ANTONIO PARTNERSHIP FOR PRECISION THERAPEUTICS (NEW)

Annual Funding Request: \$2,500,000/year

The San Antonio Partnership for Precision Therapeutics (SAPPT) has a goal to combat diseases that threaten public health and wellness, with a specific focus on COVID-19 and other bio-threat agents of concern. The initiative will focus investments to vaccine prototyping and vaccine formulations for eventual human use. By merging the resources of San Antonio's stellar academic and research institutions, the SAPPT integrates the complete drug development pathway from basic research, drug discovery, testing and clinical trials, to rapidly develop lifesaving solutions to pandemic threats, starting with COVID-19. The SAPPT collaborative will provide the scientific community with a means to respond to this current pandemic, and build capacity to respond to the next pandemic. Leveraging the Vaccine Development Center of San Antonio's mission to fund innovative collaborative research on vaccine development, the SAPPT will expand efforts beyond bench science, fast tracking research efforts and laying the groundwork to tackle future emergent diseases.

HcAP COVID DISPARITIES – DATA DASHBOARD (NEW)

Annual Funding Request: \$1,500,000/year

COVID-19 has brought attention to health disparities experienced by vulnerable populations and communities. Differences in COVID-19 risk, testing availability, complications, and outcomes are indicators of underlying issues facing communities in relation to lack of transportation, access to healthcare, limitations on working from

Administrator's Statement

10/22/2020 8:43:08PM

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

743 The University of Texas at San Antonio

home, and other social determinants. Mass closures to mitigate the transmission of COVID-19 will likely exacerbate differences between the most vulnerable communities and their more affluent counterparts. Even after a COVID-19 vaccine is available, the residual impacts of the pandemic and closures will likely remain, creating larger disparities in income, education, health, and access. The new UTSA College for Health, Community and Policy (HCaP) was launched in early 2020, just before the pandemic hit. Through this new initiative, the HCaP will create a Data Center Dashboard to: (1) assess how technology, the built environment, and policy impact vulnerable communities in Bexar County in relation to educational, nutritional, physical health, and mental health outcomes; (2) examine disparities worsened by COVID-19 and differential access to testing and vaccinations throughout Bexar County; (3) use a community-based participatory research approach to create mechanisms to circumvent impacts of COVID-19 related closures; and (4) evaluate impacts of the interventions.

OTHER PRIORITIES

In the event circumstances change during the 87th Legislature and an opportunity is presented to address capital construction needs, UTSA would request support for the following as part of our commitment to student success, research, innovation and entrepreneurship:

INNOVATION, ENTREPRENEURSHIP & CAREERS BUILDING

Total project cost: \$161,250,000

UTSA seeks to construct a new 250,000 GSF Innovation, Entrepreneurship & Careers Building as part of our Downtown Campus expansion. Subject to further program development, the proposed facility is expected to provide teaching labs, classrooms, meeting rooms, student study space, faculty offices, and research labs, addressing the university's current 1.3 NSF space deficit.

Not only will this building serve to augment UTSA's College of Business, it will also support programs within UTSA's new \$90M School of Data Science and National Security Collaboration Center (SDS-NSCC)

With particular focus on digital capabilities, predictive analytics and virtual technologies, this building is critical for undergraduate and graduate instruction at UTSA to prepare students for future workforce needs. This space will also support the new collaborative degree programs among Business, Engineering and Sciences, supporting multidisciplinary and collaborative research. The IECB will be a highly accessible I&E accelerator and collision space for underserved demographic groups that otherwise would not have the opportunity to participate in this part of the high-growth, high-value economy. This is the next logical step in UTSA's Master Plan.

CURRENT FUNDING LINES

Formula Funding

In the previous legislative session, budget constraints prevented any adjustments in the formula to fund enrollment growth. This is a significant issue for UTSA, as it is for other growing universities in Texas. Over the past two academic years UTSA's enrollment has grown by 6.5% and plans to serve more students in the future are integral to UTSA's institutional vision. We are hopeful that during this coming session both enrollment growth and inflation corrections within the formula can be addressed. This funding is necessary in order to help UTSA move toward the goals outlined in the Texas Higher Education Coordinating Board's 60x30TX plan.

Non-formula Support

UTSA has several existing non-formula support appropriations that fund critical initiatives for our students and faculty, for our local community and for the State of Texas. Additional information about the following non-formula support items can be found in Higher Education Schedule 9 in this Legislative Appropriations Request.

Administrator's Statement

10/22/2020 8:43:08PM

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

743 The University of Texas at San Antonio

INSTITUTIONAL ENHANCEMENT

General Revenue Fund - \$1,788,839/year

This supports faculty hiring and recruitment, allowing UTSA to reduce student-faculty ratios and meet the demands of our growing student population. UTSA uses these funds to increase the number of course sections offered.

FOSTER CARE PILOT PROGRAM

General Revenue Fund - \$1,750,000/year

The Bexar County Fostering Educational Success program is an innovative, collaborative partnership between UTSA, Texas A&M-SA, the Alamo Colleges District, the Bexar County Children's Court, Child Advocates of San Antonio (CASA-SATX) and Family Tapestry. The model is a trauma-informed, strategic framework that incorporates evidence of best practices, coaching, and holistic support to meet the educational aspirations and unique needs of students with foster care history in a dedicated and safe space. UTSA appreciates that this important program was exempted from reductions in 2020-2021 biennium and is exempt from the 2022-2023 baseline request level reductions per the policy letter.

SAN ANTONIO LIFE SCIENCES INSTITUTE

General Revenue Fund - \$1,388,570/year

This supports collaboration and alignment between UTSA and UT Health San Antonio. Leveraging each university's research and teaching strengths, SALSI provides students at both institutions with opportunities to collaborate on research, utilizing faculty and laboratories at both campuses.

PREFRESHMAN ENGINEERING PROGRAM

General Revenue Fund - \$285,729/year

The Prefreshman Engineering Program (PREP) at UTSA is a rigorous summer program that prepares middle and high school students for advanced studies and careers in STEM fields. Founded in 1979, PREP has served over 40,000 participants, providing a learning experience and exposure to STEM education and careers. Of students participating in PREP, 80% are members of minority groups and 53% are female.

THE INSTITUTE OF TEXAN CULTURES

General Revenue Fund - \$1,001,572/year

The Institute of Texan Cultures gives voice to the experiences of people from across the globe who call Texas home, providing insight into our past, present, and future. Specifically, the institute produces exhibits, programs, and special events, as well as teacher training opportunities for the benefit of Texas students, educators, and citizens. The institute's rich collections and programs celebrate the state's heritage and draw lessons from the cultural, economic, industrial, financial, and social contributions of Texans from around the world.

SMALL BUSINESS DEVELOPMENT CENTER (SBDC)

General Revenue Fund - \$2,742,957/year

This promotes small business and community economic development through extension services covering the 79-county South- West Texas Border Region, in cooperation with the U.S. Small Business Administration and UTSA as regional administrator of the Small Business Development Center (SBDC) program. Currently, SBDCs are reacting to the immediate needs caused COVID-19. Additional resources would allow SBDCs to structure partnerships designed to increase small business awareness and approaches to ensure survival, resiliency, and strategic business recovery planning and implementation efforts.

Administrator's Statement

10/22/2020 8:43:08PM

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

743 The University of Texas at San Antonio

SOUTH-WEST TEXAS BORDER SBDC (RURAL INITIATIVE)

General Revenue Fund - \$877,750/year

The mission of the SBDC Rural Business program (RBP) is to increase the competitiveness of rural communities in the South- West Texas Border region by promoting small business economic activity and investment where corporate expansions and State incentives such as the Texas Enterprise Fund are rarely accessible options . The RBP assists rural communities with business development projects, strategic planning and resource development, local capacity building, implementation of rural infrastructure, as well as SBDC individualized business assistance. This has been particularly helpful to communities reliant on unpredictable and highly volatile oil and natural gas revenues.

TEXAS DEMOGRAPHIC CENTER

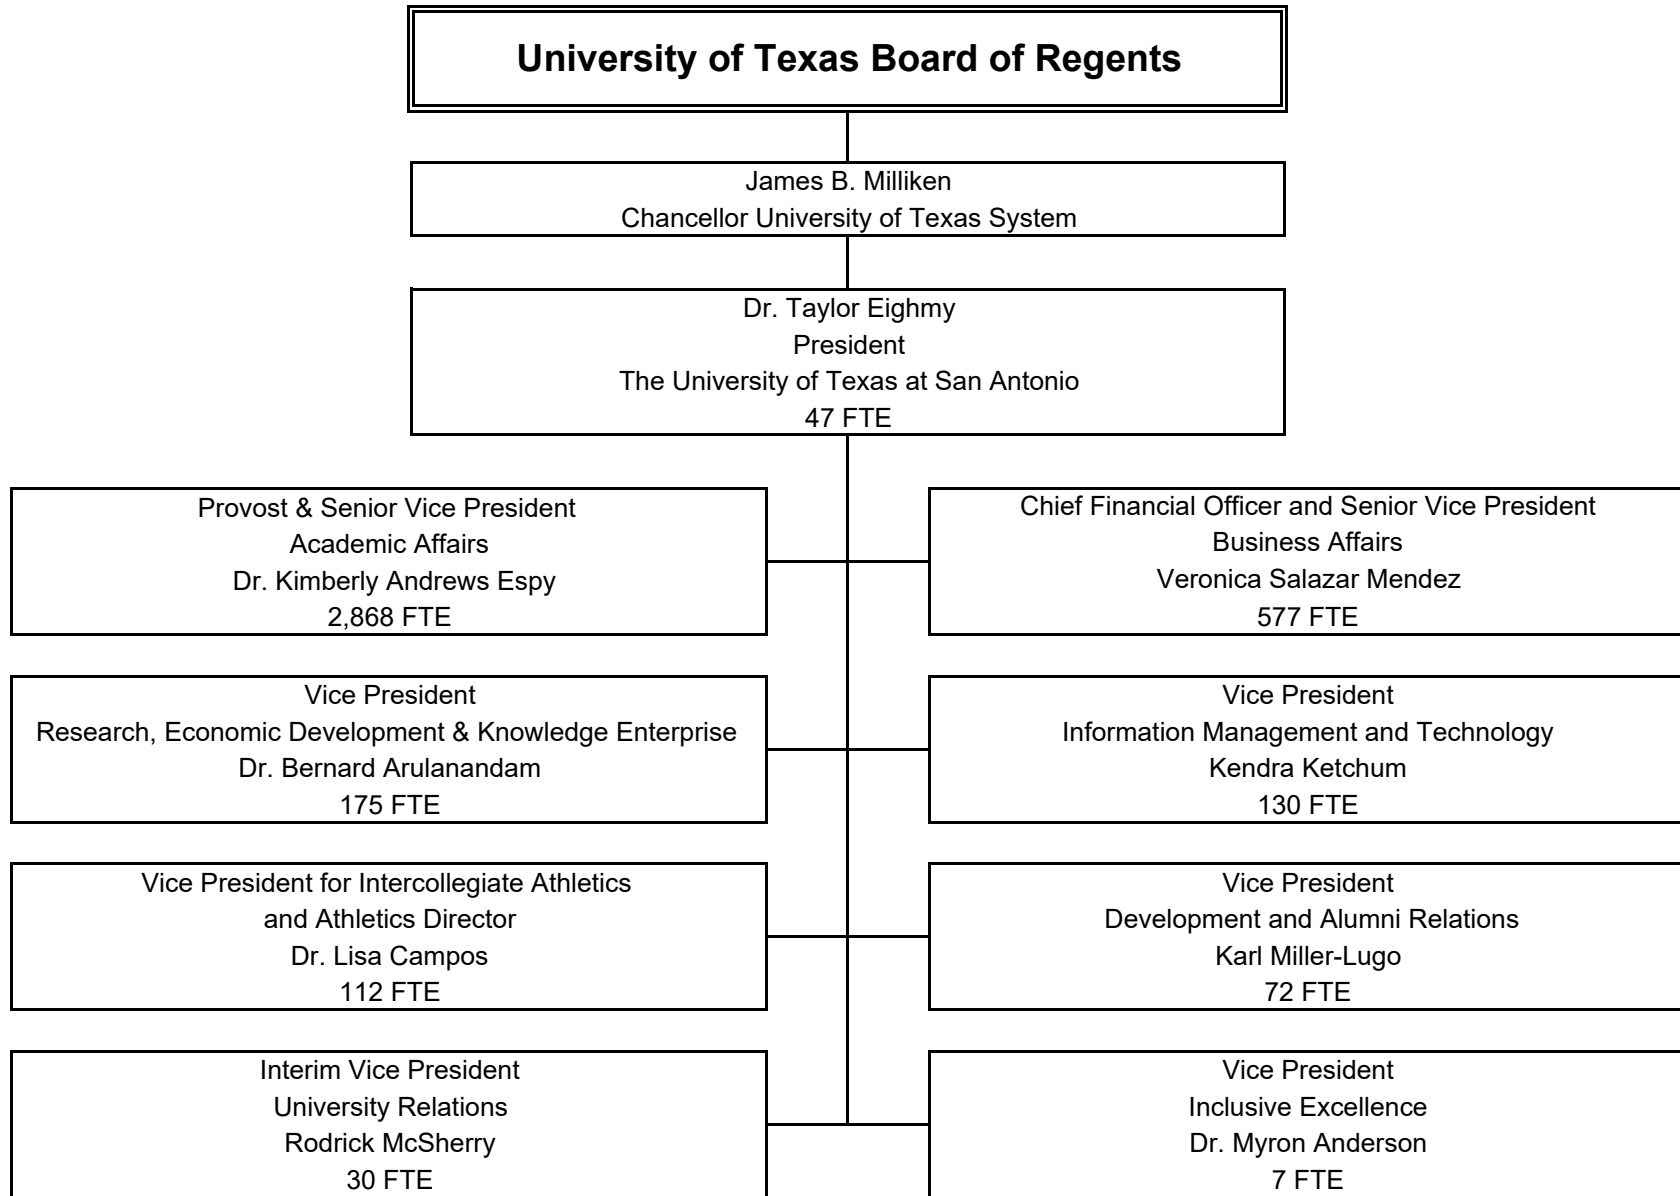

General Revenue Fund - \$352,439/year

The Texas State Data Center provides demographic, economic, and related data to Texas legislators, legislative committees, state agencies, counties and municipalities, and the private sector. The Data Center produces population estimates, biennial projections, and trend analysis affecting Texas.

CRIMINAL BACKGROUND CHECKS

UTSA's policy is to obtain criminal history record information on all finalists considered for appointment to a security sensitive position , as allowed by Texas Government Code Section 411.094, Texas Education Code Section 51.215, and UT System Policy UTS124. The President of UTSA has designated all positions at UTSA to be security sensitive.

The University of Texas at San Antonio Organizational Chart

The University of Texas at San Antonio

President

Reporting to the President: Chief of Staff, Audit and Consulting Services, Legal Affairs, Institutional Compliance and Risk Services (47 FTE)

Provost and Senior Vice President for Academic Affairs

Reporting to the Provost are Deans of the nine colleges: College of Architecture, Construction and Planning; College of Business; College of Education and Human Development; College of Engineering; College of Health, Community & Policy; College of Liberal and Fine Arts; College of Sciences; Honors College; and University College. Other areas reporting to the Provost include: Graduate & Postdoctoral Studies, Library, Global Initiatives, Academic Innovation, Academic Success, Faculty Success, Student Affairs, Strategic Enrollment, Strategic Educational Partnerships, Student Success, and Institutional Research & Analysis (2,868 FTE)

Chief Financial Officer and Senior Vice President for Business Affairs

Reporting to Business Affairs: Budget and Financial Planning, Business Contracts, Campus Services, Facilities, Financial Affairs, People Excellence, and Public Safety (577 FTE)

Vice President for Research, Economic Development & Knowledge Enterprise

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The funds are distributed on a weighted semester credit hour basis. The rate per weighted semester credit hour is established by the Legislature each biennium.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Infrastructure Support formula distributes funding associated with plant-related formulas and utilities. This formula is driven by the predicted square feet for universities' educational and general activities produced by the Coordinating Board Space Projection Model. The portion of the formula related to utilities is adjusted to reflect differences in unit costs for purchased utilities, including electricity, natural gas, water and wastewater, and thermal energy.

The program's mission is to improve college enrollment, retention and graduation rates for students with a history of foster care, by expanding the students' emotional, social and professional networks, and increasing the number of youth in foster care who understand that attending college is achievable and expected and ensuring that they are academically and emotionally prepared to do so. Thus, we: 1) empower youth/young adults, using trauma-informed and holistic care, to increase their educational attainment and employment preparedness; 2) learn from our students' lived experiences, advocate for policy change and social justice, and continuously work to identify needs, bridge connections, and promote success; 3) provide barrier-free access in education and housing, promote the power of our student's voice, teach skills that aid in building supportive relationships and community connections, and encourage positive expectations for the future.

H.B. 1716 and its companion bill S.B. 728, during the 77th session of the Legislature, authorized the creation of the San Antonio Life Sciences Institute (SALSI), a joint initiative between UTSA and UT Health SA. This institute was designed to: (1) facilitate the establishment of collaborative activities between public and private institutions that would lead to the overall enhancement of their research, teaching and service missions; (2) to promote collaboration (e.g. joint doctoral programs and research projects) between these two institutions; and (3) to enable the development of initiatives that will stimulate the growth of the biomedical and biotechnology industries in San Antonio and South Texas that foster the commercialization of the products of research at the partner institutions. SALSI's goal is to develop synergies in research and education that exceed the combined efforts of the institutions if each acts alone. The outcomes ultimately will enhance research funding at all partner institutions and provide new advanced degree opportunities for students. In addition the biomedical/biotechnology industry offers a unique opportunity for both UTSA and the UTHSCSA to develop university/industry partnerships, to help San Antonio and South Texas to become a major player in the industries of the future, and to become major drivers of the San Antonio and South Texas Economy.

The mission of the Small Business Development Center is to promote small business and community economic development through extension services covering 79-county South-West Texas Border region, in cooperation with U.S. Small Business Administration and UTSA as regional administrator of the SBDC program. The SBDC's promote the growth, expansion, innovation, increased productivity, and improved management for small business through activities of individual business counseling and technical assistance, group training seminars and workshops, advocacy, and research information. The SBDC involves students and faculty through structured service-learning and applied research activities to benefit small businesses through our public service mission. Specialty SBDC's promote international trade, technology commercialization, corporate and public contracting, and rural business. The SBDC is an accredited member of the Association of Small Business Development Centers.

The mission of the SBDC Rural Business program (RBP) is to increase the competitiveness of rural communities in the South-West Texas Border region by promoting small business economic activity and investment where corporate expansions and State incentives such as the Enterprise Fund and Emerging Technology Fund are rarely accessible options, so home-growing Texas business becomes essential. The RBP assists rural communities with business development projects, strategic planning and resource development, local capacity-building, implementation of rural infrastructure, as well as SBDC individualized business assistance to access capital and expand market reach, such as export and contracting opportunities. The RBP convenes an annual statewide rural development conference supported by the Governor's office of Economic Development and Tourism, Texas Department of Agriculture, U. S. Small Business Administration, U. S. Department of Agriculture, the Texas Workforce Commission and many economic development organizations and rural communities. The "Texas Rural Challenge" helps identify new markets for traditional products, sector diversification, business development and infrastructure, and growth strategies.

The Core Research Support Fund is established to provide funding to promote increased research capacity at those institutions designated as an emerging research university under the Higher Education Coordinating Board's (THECB) accountability system.

Funding is to be expended for the support and maintenance of educational and general activities, including research and student services that promote increased research capacity.

A legislatively determined amount of funding is appropriated to eligible institutions as follows: (1) 50 percent based on the average amount of restricted research funds expended by each institution per year for the three preceding state fiscal years as reported to THECB; and (2) 50 percent based on the average amount of total research funds expended by each institution per year for the three preceding state fiscal years as reported to THECB.

3.A.1. PROGRAM-LEVEL REQUEST SCHEDULE
87th Regular Session, Agency Submission, Version 1

Program Prioritization: *Indicate the methodology or approach taken by the agency, court, or institution to determine the ranking of each program by priority.*

Our prioritization process front loads those items that are essential to UTSA's ability to deliver core programs and services, beginning with Tuition Revenue Bond funding to fulfill the debt service payments on bonds that have been issued to date, followed by formula funded Operational Support and E&G Space Support. Our next priorities—Institutional Enhancement programs—are needed to augment our enrollment formula funding to meet our students' instruction and academic support needs. Research continues to be a top priority, and our CORE research formula funding is instrumental in UTSA's trajectory as a nationally recognized research institution. Non-formula special item funding programs are next, with two new requests at the top of the list: restoration of the 5% reduction and our new Cyber Advanced Manufacturing effort. All other non-formula special item funding supports programs essential to our university, our community and our state, resulting in wide impact should they not be funded. Examples include the new Bexar County foster care program, our existing pre-engineering programs for college bound students, SBDC for our state counties and rural areas, state demographics, and COVID programs to help our community and veterans. The priority list concludes with critical employee benefit programs which are funded from our non-general revenue sources under the current funding formula structure.

3.B. Rider Revisions and Additions Request

Agency Code: 743	Agency Name: The University of Texas at San Antonio	Prepared By: Tammy Anthony	Date: 8/30/2020	Request Level: BASE
Current Rider Number	Page Number in 2020–21 GAA	Proposed Rider Language		
Special Provisions Relating Only to State Agencies of Higher Education Sec 60 (2)	III-279	<p>Sec. 60. Emerging Research Universities Research Funding.</p> <p>2. Core Research Support: Provides core research at the Emerging Research Universities. Any unexpended balances as of August 31, 2020 <u>August 31, 2022</u>, are hereby appropriated for the same purpose for the fiscal year beginning September 1, 2020 <u>September 1, 2022</u>.</p> <p><i>Requesting proposed update to dates for unexpended authority for next biennium.</i></p>		
UTSA Rider 3	III-92	<p>Institute of Texan Cultures. Out of the funds appropriated above, it is the intent of the Legislature that The University of Texas at San Antonio spend up to \$1,001,572 <u>\$932,113</u> in fiscal year 2020 <u>2022</u> and \$1,001,571 <u>\$932,112</u> in fiscal year 2021 <u>2023</u> for the Institute of Texan Cultures.</p> <p><i>Updated years.</i></p>		
UTSA Rider 4	III-92	<p>Unexpended Balances Between Fiscal Years: San Antonio Life Sciences Institute. Any unexpended balances as of August 31, 2020 <u>August 31, 2022</u> from the appropriations identified in Strategy C.2.1, San Antonio Life Sciences Institute, are hereby appropriated to The University of Texas at San Antonio for the same purpose for the fiscal year beginning September 1, 2020 <u>September 1, 2022</u>.</p> <p><i>Requesting proposed update to dates for unexpended authority for next biennium.</i></p>		
UTSA Rider 5	III-92	<p>Foster Care Pilot Program. Included in the amounts above, \$1,750,000 out of the General Revenue Fund and 35.0 FTEs in each fiscal year of the 2020-21 biennium is. Funds appropriated to The University of Texas at San Antonio in Strategy C.1.5 <u>are to establish and maintain</u> integrated foster care support programs on college campuses in Bexar County. Any unexpended balances as of August 31, 2022, from the appropriations identified in Strategy C.1.2, Foster Care Pilot Program, are hereby appropriated to The University of Texas at San Antonio for the same purpose for the <u>fiscal year beginning September 1, 2022.</u></p> <p><i>Requesting update to Rider and addition of unexpended authority for next biennium</i></p>		

4.A. Exceptional Item Request Schedule
 87th Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: 10/22/2020
 TIME: 8:43:39PM

Agency code: 743

Agency name:
The University of Texas at San Antonio

CODE	DESCRIPTION	Excp 2022	Excp 2023
	Item Name: Restoration: 2022-23 Base Reduction Item Priority: 1 IT Component: No Anticipated Out-year Costs: Yes Involve Contracts > \$50,000: No Includes Funding for the Following Strategy or Strategies: 03-04-01 Institutional Enhancement		

OBJECTS OF EXPENSE:

2009	OTHER OPERATING EXPENSE	428,413	428,413
TOTAL, OBJECT OF EXPENSE		\$428,413	\$428,413

METHOD OF FINANCING:

1	General Revenue Fund	428,413	428,413
TOTAL, METHOD OF FINANCING		\$428,413	\$428,413

DESCRIPTION / JUSTIFICATION:

Performing our core mission is more critical than ever before in light of the pandemic and the upcoming years of recovery. Restored funds will allow us to meet our greatest need right now and protect our core mission to produce workforce talent, generate new knowledge and serve the community. Not only will restored funds help us to overcome the impacts of this pandemic, but they will allow us to focus on specific priorities identified by the University of Texas System, including student success, increased access and innovation, and effective delivery of our services.

EXTERNAL/INTERNAL FACTORS:

Without this funding, UTSA will likely see impacts to student retention rates as well as our ability to shorten time to graduation and offer financial aid awards. This funding will be used to support student success initiatives and improve our efforts for attracting world-class faculty and researchers—factors that also directly and indirectly impact our enrollment.

See Schedule 9 for additional information.

FULL-TIME EQUIVALENT POSITIONS (FTE):		6.00	6.00

DESCRIPTION / JUSTIFICATION:

Cybersecurity attacks are threatening Texas Advanced Technology and Manufacturing companies that are essential to the Texas Economy and San Antonio. The U.S. government is adopting Cybersecurity Maturity Model Certifications (CMMC) which will be required for all U.S. manufacturers. UTSA will use its two cybersecurity powerhouses (the Cybersecurity Manufacturing Innovation Institute and the National Security Collaboration Center) to assist manufacturers with getting certified, improving their cybersecurity, training the workforce, and expanding their global competitiveness. The Department of Energy recently selected UTSA to establish the nation's first Institute to focus on cybersecurity for manufacturing. This \$111M Cybersecurity Manufacturing Innovation Institute (CyManII) thrusts UTSA into the highest tier of institutions safeguarding U.S. assets, intellectual property, and advanced manufacturing. Funding through this special initiative will leverage CyManII to: a) support education about CMMC for Texas companies and manufacturers so they can grow their business volume, b) develop tools to demonstrate achievement of certification that meets evolving Certifications, c) develop a US hub for "pandemic adaptive supply chain" management positioning Texas manufacturers for global leadership, and d) assist Texas cybersecurity innovators to secure Texas manufacturers.

EXTERNAL/INTERNAL FACTORS:

See Schedule 9 for additional information.

CODE	DESCRIPTION	Excp 2022	Excp 2023
-------------	--------------------	------------------	------------------

DESCRIPTION OF IT COMPONENT INCLUDED IN EXCEPTIONAL ITEM:

UTSA will contract with Cisco to develop web-based training modules and digital security assessment tools for Texas Manufacturers. These open source tools will be provided at not cost to ensure compliance with new federal certification requirements. These training modules and assessment tools will be integrated into CyManII “Learning Lab” and the “Cyber Operation Research Ecosystem” to deliver practical training materials quickly, efficiently, on-site, and at industry scale.

IS THIS IT COMPONENT RELATED TO A NEW OR CURRENT PROJECT?

NEW

STATUS:

This IT project is contingent on approval of this special item request.

OUTCOMES:

Deliverables dependent on this IT investment include the development of: 1) training modules to inform Texas companies about the CMMC requirements and how to meet them, 2) identify and verify the usability of risk management tools, and make these available to Texas manufacturers and businesses, 3) training modules to configure and secure cloud services that meet CMMC requirements, 4) use the CyManII infrastructure to launch a R&D enterprise for the delivery of a “secure manufacturing architecture” for Texas companies, thus increasing their ability to meet CMMC requirements and to out-innovate their competitors.

OUTPUTS:

90% CMMC compliance by Texas Manufacturers

TYPE OF PROJECT

Other Service Delivery Functions

ALTERNATIVE ANALYSIS

This request leverages federal funding to create a focused approach to cyber certification for Texas manufacturers. Funding will establish the infrastructure and programming needed to sustain beyond this funding request.

ESTIMATED IT COST

2020	2021	2022	2023	2024	2025	2026	Total Over Life of Project

DESCRIPTION / JUSTIFICATION:

Established in the 7th largest city in the US, The San Antonio Partnership for Precision Therapeutics (SAPPT) has a goal to develop targeted therapeutics that takes into account the diversity of patient populations. Precision therapeutics gives clinicians treatment modalities that incorporates the complex biological and environmental mechanisms underlying a patient's health, disease, or condition, and to better predict which treatments will be most effective. By merging the resources of stellar academic and research institutions in San Antonio, the SAPPT integrates the complete drug development pathway from basic research, drug discovery and testing to clinical trials, to rapidly develop lifesaving solutions including to pandemic threats such as COVID-19. Leveraging the Vaccine Development Center of San Antonio, the SAPPT will expand its efforts beyond bench science to engage the community and lay the groundwork to tackle other emergent diseases in the future.

EXTERNAL/INTERNAL FACTORS:

SAPPT's program promotes the integration of basic research and therapeutics channels with innovative "multiomic" or big data integration of precision medicine with the goal of developing novel precision therapies and/or approaches to individualized therapies in any disease area. This powerful partnership aligns the unparalleled bioscience capabilities, resources and military medicine opportunities available in San Antonio to improve health care in Texas and beyond. Together, UT Health San Antonio, The University of Texas at San Antonio, Texas Biomedical Research Institute and Southwest Research Institute will advance innovative and high-impact biomedical research in precision therapeutics. To date, the SAPPT has funded collaborative projects, from Covid Vaccine Development, to development of therapeutic targets toward the SARS-CoV-2 virus and further understanding how coronavirus evades the host immune system.

DESCRIPTION / JUSTIFICATION:

COVID-19 has brought attention to health disparities experienced by vulnerable populations and communities. Differences in COVID-19 risk, testing availability, complications, and outcomes are indicators of underlying issues facing communities in relation to lack of transportation, access to healthcare, limitations on working from home, and other social determinants. Mass closures to mitigate the transmission of COVID-19 will likely exacerbate differences between the most vulnerable communities and their more affluent counterparts. Even after a COVID-19 vaccine is available, the residual impacts of the pandemic and closures will likely remain, creating larger disparities in income, education, health, and access. The College for Health, Community and Policy (HCaP) was launched in early 2020, just before the pandemic hit. This initiative will: (1) assess how technology, the built environment, and policy impact vulnerable communities in Bexar County in relation to educational, nutritional, physical health, and mental health outcomes; (2) examine disparities worsened by COVID-19 and differential access to testing and vaccinations throughout Bexar County; (3) use a community-based participatory research approach to create mechanisms to circumvent impacts of COVID-19 related closures; and (4) evaluate the impacts of the interventions.

EXTERNAL/INTERNAL FACTORS:

The COVID19 pandemic will likely worsen existing disparities, especially among the most vulnerable populations. HCaP's mission is to improve the wellbeing of the world around us and develop recommendations for complex social problems, provides an opportunity for the HCaP to respond to the pandemic for San Antonio's community wellbeing. Through this initiative, HCaP will work to understand how people have been differently affected in the San Antonio metropolitan area and two comparison rural areas located nearby. Understanding COVID-19 will ultimately make us better prepared to understand and minimize all health disparities. We plan to draw on expertise situated in UTSA's: (a) Institute for Demographic and Socioeconomic Research, which uses population level data to investigate issues related to poverty, transportation, and high risk groups, (b) Center for Community Based and Applied Health Research, which partners on community-based solutions related to food insecurity, health equity, and poverty,

	Total Expenditures		33.5%		\$24,035,641	\$71,780,671		28.2%		\$20,528,408	\$72,736,824	

B. Assessment of Fiscal Year - Efforts to Meet HUB Procurement Goals

Attainment:

UTSA attained 4 of the 6 statewide HUB goals, and 4 of 6 agency goals in fiscal year 2018. UTSA attained 3 out of 6 of the statewide HUB goals, and 4 of 6 agency goals in fiscal year 2019. For fiscal year 2018 & 2019, The Office of the Comptroller of Public Accounts ranked UTSA # 9 (2016) and #6 (2017) in the Top 25 Agencies Spending More than \$5 Million with Largest Percentage Spent with HUBs.

Applicability:

All categories were reported as applicable because the HUB reported expenditures in Heavy Construction, when normally Heavy Construction is not reported due to the fact we are an educational institution which never procure these services for our wide range of projects.

Factors Affecting Attainment:

Competition in all procurement categories has increased due to a challenging economy. The increased competition has resulted in less HUB vendors being awarded. In addition, cost saving measures, such as utilizing group cooperatives and other strategic contracts with minimum to no utilization of HUB partners under these agreements, has been a factor in attainment. Not all contract decisions are subject to the agency's control and many are unique or specialized contract agreements.

"Good-Faith" Efforts:

The objective of UTSA Good Faith Effort and Goals has been fully implemented in Fiscal Year 2018 & 2019 State of Texas TAC 34 Part 1 Chapter 20 Subchapter B Rule 20.15-Item C.

- Finding HUB vendors that are ready, willing and able
- Support within the development of bids and specifications
- Evaluation of HUB Subcontracting Plan to ensure vendors are upholding bid requirements

6.A. Historically Underutilized Business Supporting Schedule
87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: **10/22/2020**
Time: **8:43:39PM**

Agency Code: **743** Agency: **The University of Texas at San Antonio**

- Answer questions that may arise from different bid solicitations with written justification
- Assist with the marketing, registration, and updating of UTSA HUB vendor internal database
- Assist department with information and procedures over the HUB Program and HUB Vendors
- Hosted and attended HUB Forums to meet and share contracting opportunities at UTSA.
- Trained staff, new and existing buyers of HUB Program
- HUB Program Information on UTSA goals and procedures of program
- The HUB Outreach program objectives are (1) to become knowledgeable of HUB Vendors capabilities and (2) to inform the HUB community of business opportunities with UTSA
- HUB Vendor Shows
- Hosted and attended HUB Vendor Fairs and Economic Opportunity Forums
- Presented at HUB events on contracting opportunities

USE OF HOMELAND SECURITY FUNDS

A theoretical framework for cyber defense operations which leads to advanced understanding and knowledge of survivability principles that can guide effective cyber defense operations. State and Local Homeland Security National Training Program that will deliver training programs that are national in scope and have an importance in implementation of the National Preparedness System and support building, sustainment, and delivery of core capabilities essential to achieving the national Preparedness Goal of a secure and resilient nations. Analyses and Training for Defense of Biological and digital threats. Collaborative research in privacy enhanced secure date and provenance, usable formal methods for the design and composition of security and privacy policies and standards for information sharing and analysis organizations . Creating a Center for Security and Privacy Enhanced Cloud Computing. Detecting threatening insiders with lightweight media forensics, improving the usability of security requirements by software developers through empirical studies and mobile assisted security in wireless sensor networks. Surviving cyber security and privacy threats in wearable mobile cyber physical systems. Funds are also used for modeling, analyzing and predicting cyber attacks and to also develop integrated framework for the detection and mitigation of GPS spoofing attacks in smart grid.

Cybersecure Advanced Manufacturing for Texas

(1) Year Non-Formula Support Item First Funded:	2022
Year Non-Formula Support Item Established:	2022
Original Appropriation:	\$2,500,000

(2) Mission:

Cybersecurity attacks are threatening Texas advanced technology and manufacturing companies that are essential to the Texas and San Antonio economy. The U.S. government is adopting Cybersecurity Maturity Model Certifications (CMMC) which will be required for all U.S. manufacturers. UTSA will use its two cybersecurity powerhouses, the Cybersecurity Manufacturing Innovation Institute (CyManII) and the National Security Collaboration Center (NSCC), to launch the Cybersecure Advanced Manufacturing for Texas Initiative to assist Texas manufacturers with getting certified, improving their cybersecurity, training their workforce, and expanding their global competitiveness. Under this initiative, UTSA will a) support education about CMMC for Texas companies and manufacturers so they can significantly grow their business volume, b) develop tools to demonstrate achievement of CMMC certification that meets evolving federal requirements, c) develop the "Center for Pandemic Adaptive Supply Chain Management", positioning Texas manufacturers for global leadership in this area, d) develop and disseminate cybersecurity innovations to secure Texas manufacturers.

(3) (a) Major Accomplishments to Date:

UTSA is a premier center for cybersecurity and national defense. The Department of Energy recently selected UTSA to establish the nation's first Institute to focus on cybersecurity for manufacturing. This \$111M Cybersecurity Manufacturing Innovation Institute thrusts UTSA into the highest tier of institutions safeguarding U.S. assets, intellectual property, and advanced manufacturing. This special initiative focuses CyManII and the NSCC on Texas manufacturers and businesses and represents a unique opportunity to leverage \$111M for Texas. The Cybersecure Advanced Manufacturing for Texas initiative and the Center for Pandemic Adaptive Supply Chain Management will be imbedded within CyManII and housed within the NSCC facility.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Major accomplishments expected from this investment include: 1) training modules to inform companies about the CMCC requirements and how to meet them, 2) identify and verify the usability of risk management tools, developed in Texas in collaboration with the NSCC, and make these available to Texas manufacturers and businesses, 3) use of the CyManII "Learning Lab" and the "Cyber Operation Research Ecosystem" to deliver practical training materials quickly, efficiently, on-site, and at industry scale, 4) training modules to show how to add 2-factor identification into their infrastructure, 5) training modules to configure and secure cloud services that meet CMCC requirements, 6) develop the world's first educational program in pandemic adaptive supply chain risk management, and 7) use the CyManII infrastructure to launch a R&D enterprise for the delivery of a "secure manufacturing architecture" for Texas companies, thus increasing their ability to meet CMMC requirements and to out-innovate their competitors.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Dept of Energy funding to begin 9/1/20 will be directed to national level initiatives. This will leverage CyManII's federal support to provide targeted training, support for Texas manufacturers and businesses.

743 The University of Texas at San Antonio

(5) Formula Funding:

CyManII can target Texas focused industry membership, with potential to generate revenue/in-kind cost share in support of the program. Anticipated support could reach \$1,000,000/year by end of 22/23 biennium.

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

None

(9) Impact of Not Funding:

The U.S. Government is issuing new cybersecurity certification requirements for all of their contracts; pervasive national and global adoption will likely follow. The current pandemic has intensified the need to secure our supply chains and making them pandemic adaptive and future proof. Existing government suppliers, and within three years for all manufacturers and businesses, are at enormous risk of not being able to meet these requirements. Companies that quickly meet these requirements will be highly competitive and those who fail to understand and meet these requirements will be vulnerable and at risk of financial sustainability. This special initiative will allow the CyManII and the NSCC to offer Texas manufacturers necessary training, expertise, and advanced cybersecurity knowledge to meet the impending three year timeline. This positions Texas manufacturers and businesses to maintain and substantially increase their business volume.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

N/A

(11) Non-Formula Support Associated with Time Frame:

Funding is needed for two consecutive biennium. Funding in 22/23 and 24/25 will be leveraged to establish the programs. Beyond this, the programs will be financially sustainable and integrated within CyManII.

(12) Benchmarks:

90% CMMC compliance of Texas Manufacturers and government suppliers.

(13) Performance Reviews:

of manufacturers engaged annually; # of students trained in pandemic adaptive supply chain management; # of training module users; % of Texas manufacturers meeting CMMC requirements.

743 The University of Texas at San Antonio

Foster Care Pilot Program

(1) Year Non-Formula Support Item First Funded:	2020
Year Non-Formula Support Item Established:	2020
Original Appropriation:	\$1,750,000

(2) Mission:

The Bexar County Fostering Educational Success program is an innovative, collaborative partnership between UTSA, A&M-SA, ACD, the Bexar County Children's Court, Child Advocates of San Antonio (CASA-SATX) and Family Tapestry. The model is a trauma-informed, strategic framework that incorporates evidence of best practices, coaching, and holistic support to meet the educational aspirations and unique needs of students with foster care history in a dedicated and safe space. The program's mission is to improve college enrollment, retention and graduation rates for students with a history of foster care, by expanding the students' emotional, social and professional networks, and increasing the number of youth in foster care who understand that attending college is achievable and expected and ensuring that they are academically and emotionally prepared to do so. Thus, we:

- empower youth/young adults, using trauma-informed and holistic care, to increase their educational attainment and employment preparedness;
- learn from our students' lived experiences, advocate for policy change and social justice, and continuously work to identify needs, bridge connections, and promote success;
- provide barrier-free access in education and housing, promote the power of our student's voice, teach skills that aid in building supportive relationships and community connections, and encourage positive expectations for the future.

(3) (a) Major Accomplishments to Date:

9/1/2019 to date:

- Outreach to more than 600 students currently enrolled at UTSA, A&M-SA, and ACD
- Establishment of campus-based support and supervised independent living (SIL) programs
- Disbursement of \$33,722.75 (as of June 15, 2020) in emergency funds and specific financial assistance
- Direct service to 230 unduplicated youth/young adults (9/1/19-6/15/20)
- Approximately 800 direct service hours
- Collaboration with over 40 university departments and community agencies for student-related need
- Establishment of a college-bound docket for 37 foster students (23 on wait list) to support the educational attainment goals
- Assignment of a court-appointed special advocate (CASA) to every college-bound docket students

(3) (b) Major Accomplishments Expected During the Next 2 Years:

743 The University of Texas at San Antonio

1. Secondary Pipeline- increase identification and engagement strategy while developing additional scholarship/financial aid opportunities
2. Campus-based support-beyond those receiving the tuition and fee waiver; Increase enrollment, # students served; refine and enhance supportive services such as, peer mentoring, career mentoring/employment opportunities, housing, child care, special programs, community building
3. Inclusion /Mentorship – targeted outreach and recruitment, direct services, mentoring, and advocacy for students of color to reduce racial disparities in education, especially males
4. Students Voice & Empowerment -students with lived foster care experience are able to use their voice, engage in advocacy and action, collaborate with other students leaders, and be a catalyst for change.
5. Data-sharing- Enhanced data sharing among systems such as child welfare, courts, K-12, and postsecondary education.
6. Strategic Action-Multi-level systems innovative design and collaborative community partnerships by way of Strategic Action Groups (SAGs). Specialized projects focus on:
 - awareness through presentations, college tours and news and social media campaigns
 - pre-college and post-secondary outreach, recruitment, and engagement
 - innovative approaches to support physical and mental health needs
 - safe and secure housing for all students
 - research and evaluation goals

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

There were no funding sources prior to receiving non-formula support funding.

(5) Formula Funding:

This program does not generate formula funding.

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Additional sources of non-general revenue sources generated to date total \$1,371,470. Of this total, \$100,000 was awarded from Impact San Antonio, a women's philanthropic organization, to provide early start onboarding programming for foster students entering college. Additionally, \$51,566 was generated from private, philanthropic donors to be used for emergency funding and financial assistance for students with a history of foster care. Lastly, \$1,219,904 (pending official approval) was awarded for FY20/21 from the U.S. Department of Housing & Urban Development through the South Alamo Regional Alliance for the Homeless to provide housing and living supports to students with a history of foster care.

(9) Impact of Not Funding:

743 The University of Texas at San Antonio

A bipartisan bill was introduced by Senators Jose Menendez (D) and Pete Flores (R) and Representative Trey-Martinez Fisher(D) that was endorsed by the entire SAT delegation. The Pilot works to increase educational access and attainment through the development of services and programming for Bexar County students, grades K-20, with a history of foster care. Research shows that students with a history of foster care who attend institutions of higher education with campus-based support programming are 6.8X more likely to graduate. Direct support services and programming designed specifically to enhance such educational access and attainment for the 600+ college-enrolled students and 3,500+ foster students in Bexar County would be discontinued at UTSA, TX A&M San Antonio, Alamo Community Colleges, CASA, and Bexar County Children's Court should this program not receive continuing funding. This would be particularly impactful during a global pandemic when our students need even more intensive support and direct services. This program is also conducting critically needed applied research that will aid other post-secondary institutions and their respective governmental and community partners in developing evidence-based programming and services; establishing the state of Texas as a national leader and exemplar in supporting students with a history of foster care to become academically and emotionally ready to succeed in college and attain their educational and career-related goals.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

We are requesting funding on a permanent basis to continue to provide educational programming and support services to vulnerable students.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

100% participants have housing, bank account, career/educational interests, goals, and mentor
85% enrolled six months after start
90% satisfactory participation rating
80% docket students enroll in college

743 The University of Texas at San Antonio

HCaP COVID Disparities - Data Dashboard

(1) Year Non-Formula Support Item First Funded:	2022
Year Non-Formula Support Item Established:	2022
Original Appropriation:	\$1,500,000

(2) Mission:

To address complex health and social issues, the College for Health, Community and Policy (HCaP) was established to promote transdisciplinary work. The college houses eight academic departments and a coordinated program in dietetics. This special item will extend the work of HCaP with four specific outputs to track the long-term effects of COVID-19 that can be applied to future pandemic scenarios. Outputs: (a) An HCaP Data Center Dashboard to allow for data sharing across stakeholders, (b) An Action Plan informed by HCaP Data Center Stakeholders on how to circumvent barriers in access to testing, healthcare, and other resources, (c) A detailed report on the demographic variations in testing, diagnosis, hospitalizations, deaths and vaccinations in the greater Bexar area, and (d) A focused, concerted effort on data harmonization across multiple platforms to expedite solutions and responses to address COVID-19 disparities.

(3) (a) Major Accomplishments to Date:

The College for Health, Community and Policy (HCaP) launched in January 2020. The founding Dean was hired in March. The College houses 8 departments - Public Health, Demography, Sociology, Psychology, Kinesiology, Public Administration, Criminology and Criminal Justice, and Sociology and the Coordinated Program in Nutrition and Dietetics.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The College will continue to expand and attract research focused faculty engaged in transdisciplinary research related to public health, community-engaged research, and public health.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

UTSA merged funding from various colleges and departments to create HCAPs inaugural budget. It doesn't include funding for research and special initiatives, such as the one proposed on this special item request.

(5) Formula Funding:

N/A

(6) Category:

Research Support

(7) Transitional Funding:

N

743 The University of Texas at San Antonio

(8) Non-General Revenue Sources of Funding:

None

(9) Impact of Not Funding:

The Dashboard will accelerate our ability to address COVID-19 related disparities locally and beyond. The Dashboard will also enable us to attract nationally recognized researchers in HCaP areas.

(10) Non-Formula Support Needed on Permanent Basis/Discontinued:

N/A

(11) Non-Formula Support Associated with Time Frame:

This funding request is for the FY22/23 biennium only.

(12) Benchmarks:

Plan to circumvent barriers in access to testing, healthcare; demographic report in testing, diagnosis, hospitalization, death, vaccination; Focused effort on data to expedite responses on COVID-19 disparities.

(13) Performance Reviews:

None

743 The University of Texas at San Antonio

Institute of Texan Cultures

(1) Year Non-Formula Support Item First Funded:	1988
Year Non-Formula Support Item Established:	1988
Original Appropriation:	\$2,302,308

(2) Mission:

The Institute of Texan Cultures gives voice to the experiences of people from across the globe who call Texas home, providing insight into our past, present, and future. Specifically, the UTSA Institute of Texan Cultures produces exhibits, programs, and special events, as well as teacher training opportunities for the benefit of Texas students, educators, and citizens, that celebrate the state's rich cultural heritage and draw lessons from the cultural, economic, industrial, financial, and social contributions of Texans from around the world.

(3) (a) Major Accomplishments to Date:

1) Provided services to more than 200,000 individuals across Texas; 2) Hosted 60 exhibits and programs on varying topics including immigration, Texan music, Baseball in Texas, Black culture and history in Texas, Native American culture and history in Texas, Mexican American culture and history in Texas Filipino culture and history in Texas, and Women's history in Texas. 3) Delivered thematic guided tours to 53,000 students, teachers and parents; 4) Produced public programs, K-12 educator workshops, and statewide presentations, serving 19,000 student and educators; 5) Increased online resources including online lesson plans on the various ethnicities that make up Texas; 6) Relaunched the website on a domain that the ITC now controls; 7) Developed a new administrative structure to develop efficiencies, new processes and workflows; 8) Expanded educator pre-service workshops; 8) Provided work/intern opportunities for 35 students in collections, research, development, education, administration, and communications; 9) ITC staff taught sections of a Museum Studies course in support of UTSA Museum Studies minor; 10) Continued service to underserved audiences with regular free admission programs serving over 800 people.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

1) Major reorganization of the Institute to improve financial sustainability, execute a new digital strategy, better integrate into UTSA's academic and research enterprises, and pivot to develop exhibits on current cultural topics in Texas; 2) Balance budget and adjust organization to special item funding levels; 3) develop digital exhibits, programs and services that will serve more Texans through the use of technology - especially important during the pandemic; 4) digitization of ITC's permanent physical exhibits, artifacts and research; 5) expand ITC's web presence, including developing a media channel focused on Texan cultures; 6) Expansion of partnerships with UTSA faculty to foster curricular innovation and support academic research; 7) Linked to UTSA's Classroom to Career Initiative, the ITC will create expanded opportunities for UTSA students to engage in experiential learning; 8) integrate the ITC collections with the UTSA Art Collection; 8) Collaboratively work with civic, governmental and cultural groups on educational programming; 9) Focus on the development of programming that resonate with intergenerational audiences; 9) Continue to provide teaching resources to K-12 educators statewide; 10) facilitation of statewide of professional development opportunities for teachers on the use of primary and secondary sources in the classroom; 11) reinvigorate philanthropic infrastructure in concert with UTSA's Capital Campaign

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Direct funding through UT System.

743 The University of Texas at San Antonio

(5) Formula Funding:

None

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Admissions, membership, endowments, and private and corporate giving

(9) Impact of Not Funding:

In the proposed 2022-2023 biennial budget, 69% of special item funds support salaries, and 31% of special item funds support operations. Further reduction of special item funding would impact the program as follows: (1) reduce the number of exhibits, events and programs the museum is positioned to deliver locally and statewide; 2) severely limit capacity at a time when racism and associated social issues are at the forefront of state and national dialogues; 3) reduce the number of 4th and 7th grade the museum will be able to serve locally and statewide; 4) reduce the number of teacher development and teacher education courses locally and statewide; 5) reduce the number of hours the museum can operate; 6) reduce the number of undergraduate and graduate interns through UTSA's Classroom to Career initiative; 7) negatively impact city and state tourism revenue; 8) negatively impact city and state efforts to enhance quality of life through cultural amenities; 9) reduce staffing.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Yes, it is needed as 100% of special item appropriation support staff salaries and museum operations.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

Metrics are measured annually. Relevant annual metrics include (1) number of Texans impacted by exhibits, programs and resources; involvement and participation of K-20 students and teachers.

743 The University of Texas at San Antonio

Institutional Enhancement (Academic and Student Support)

(1) Year Non-Formula Support Item First Funded:	2000
Year Non-Formula Support Item Established:	2000
Original Appropriation:	\$4,288,157

(2) Mission:

The University of Texas at San Antonio (UTSA) is dedicated to the advancement of knowledge through research and discovery, teaching and learning, community engagement and public service. As an institution of access and excellence, UTSA embraces multicultural traditions and serves as a center for intellectual and creative resources as well as a catalyst for socioeconomic development and the commercialization of intellectual property for Texas, the nation and the world.

(3) (a) Major Accomplishments to Date:

UTSA is on steep trajectory to be a national model for student success and research excellence. Increased enrollment to record high of 32,792, including 11% increase in doctoral students; Increased 6-year graduation rates to record-high of 50.8% (5-year jump 14.8%) through targeted student success programs; Awarded 7,029 degrees in 2018–19, the highest in university history; Established Bold Promise program, covering 100% of undergraduate tuition/fees for eligible students for 4 years; Established new College for Health, Community and Policy, transforming the way UTSA prepares students for modern human health-related careers; Created innovative support programs for students from underrepresented populations, including 64% of UTSA students who are minorities, and nearly 45% of undergrads who are first-generation in college; Hired 39 exceptional faculty over past 4 years through an innovative cluster hiring approach, helping to advance areas of research excellence in brain health, cybersecurity, analytics/data science, and artificial intelligence, among others; Expanded National Security Collaboration Center by acquiring over 50 government, industry and academic partners, securing over \$1 million in financial support and hiring retired U.S. Air Force Brigadier General as its founding executive director; Increased total research expenditures to all-time high of \$80.6 million; Generated \$2.7 billion in direct economic impact through university's Institute for Economic Development

(3) (b) Major Accomplishments Expected During the Next 2 Years:

1. Continuing implementation of UTSA's award-winning Master Plan, including expansion of the Downtown Campus through the new School of Data Science/National Security Collaboration Center, as well as the development of a Tricentennial Innovation Park on the Main Campus
2. Establishing and leading the Cybersecurity Manufacturing Innovation Institute, the result of UTSA's selection by the U.S. Department of Energy for a 5-year, \$70 million cooperative agreement
3. Continuing progress toward established goals to retain 85% of first-year students and achieve a 6-year student graduation rate of 60% by 2023
4. Establishing a new college to fully leverage faculty expertise across architecture, construction, planning and engineering, positioning UTSA on the cutting edge of transdisciplinary research and promoting community collaborations, particularly in sustainable, smart, connected cities and infrastructure
5. Completing the Roadrunner Athletics Center of Excellence on the Main Campus, a state-of-the-art athletic training facility to draw world-class student athletes to the university's Division I programs and provide recreational sports resources to San Antonio residents
6. Continuing to foster relationships with San Antonio's West Side community through a dedicated presidential initiative and UTSA's Westside Community Center, a hub for community-based research and educational/training opportunities

743 The University of Texas at San Antonio

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None

(5) Formula Funding:

None

(6) Category:

Institutional Enhancement

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

None

(9) Impact of Not Funding:

Our future student success initiatives to improve retention, shorten the time to graduation and increasing the number degrees awarded would be directly impacted without this funding. In addition, loss of funding would impact our efforts to attract world-class faculty members and researchers which in turn would impact our overall enrollment. With any loss of faculty FTE, we would expect increases in our student faculty ratio or provide fewer course sections to meet the demands of our growing student population.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Funding will be needed on a permanent basis to continue with the academic and student support going forward.

(11) Non-Formula Support Associated with Time Frame:

San Antonio Life Sciences Institute

(1) Year Non-Formula Support Item First Funded:	2010
Year Non-Formula Support Item Established:	2003
Original Appropriation:	\$4,000,000

(2) Mission:

H.B. 1716 and its companion bill S.B. 728, during the 77th session of the Legislature, authorized the creation of the San Antonio Life Sciences Institute (SALSI), a joint initiative between UTSA and UT Health SA. This institute was designed to: (1) to facilitate the establishment of collaborative activities between public and private institutions that would lead to the overall enhancement of their research, teaching and service missions; (2) to promote collaboration (e.g., joint doctoral programs and research projects) between these two institutions; and (3) to enable the development of initiatives that will stimulate the growth of the biomedical and biotechnology industries in San Antonio and South Texas that foster the commercialization of the products of research at the partner institutions. SALSI's goal is to develop synergies in research and education that exceed the combined efforts of the institutions if each acts alone. The outcome ultimately will enhance research funding at all partner institutions and provide new advanced degree opportunities for students. In addition, the biomedical/biotechnology industry offers a unique opportunity for both UTSA and the UT Health SA to develop university/ industry partnerships, to help San Antonio and South Texas to become a major player in the industries of the future, and to become major drivers of the San Antonio and South Texas economy.

(3) (a) Major Accomplishments to Date:

In the 20/21 biennium, SALSI supported interdisciplinary research collaborations that brought awareness to San Antonio's biomedical research profile and fostered collaboration between UTSA, UT Health SA, Texas Biomedical Research Institute (TBRI), Southwest Research Institute (SwRI) and the San Antonio Military Health System. Three major initiatives were supported: (1) The San Antonio Partnership for Precision Therapeutics was established to find breakthrough treatments that can be individualized to specific patient populations, (2) the Brain Health Consortium built collaborative teams using multidisciplinary approaches to advance our basic understanding of the brain in order to prevent and treat the most debilitating brain disorders, and (3) the AI Institute was established to better understand how AI can improve human wellbeing and security. Over the past two biennium, SALSI and has sponsored 15 collaborative research projects and has led to the filing of five patents/copy rights and more than 30 grant submissions yielding over \$15 million in follow-on funding. SALSI has supported dozens of conferences/events, including the San Antonio Military Health System and Universities Research Forum, the region's premier academic-industry-military research exchange. SALSI funding was leveraged to support COVID-19 related research to study and develop a novel vaccine to combat this disease. To date, SALSI has graduated more than 100 masters students and more than 60 PhD students.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

In the 22/23 biennium, UTSA will leverage SALSI funding to fully launch the Health Analytics academic program in collaboration with UT Health SA. Funding will be leveraged to establish a Health Analytics research laboratory in the heart of downtown San Antonio, where students and faculty from across multiple institutions can conduct collaborative research. The SAPPT will be further supported, with funding slated to sponsor collaborative research between UT Health SA, TBRI and SwRI. Collaborative seed grant programs will be sponsored in areas of AI, Brain Health, Human Performance and Health/IT Security. Partnerships between UTSA, UT Health SA and the San Antonio Military Health Institute will be expanded through collaborative research and engagement in the spring 2021 and 2022 San Antonio Military Health System and Universities Research Forum. Dedicated funding will also be leveraged to further support COVID-19 related research within the San Antonio biomedical community.

743 The University of Texas at San Antonio

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

SALSI was established in 2003 with initial cash investment of \$4.5M from UTSA (\$1M), UT Health SA (\$1M), and The University of Texas System (\$2.5M) as well as \$1.25M of in-kind funding.

(5) Formula Funding:

N/A

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

SALSI leverages additional funding from the San Antonio Partnership for Precision Therapeutics, where UT Health SA, Texas Biomedical Research Institute and Southwest Research Institute both contribute \$200K (each) annually in support of this initiative. This brings an additional \$800K in funding per biennium to support the SAPPT. The Health Analytics Program also leverages UTSA's future School of Data Science, which launches fall 2020, where the Initiative will be housed in the future downtown building funded by UT System's Board of Regents. UTSA and UT Health SA will co-locate faculty, research staff and students in this future facility slated for launch in spring 2022. During this biennium, the Health Analytics Program will launch on UTSA's main campus.

(9) Impact of Not Funding:

UTSA and UT Health SA have been working closely to leverage SALSI funding to build joint research and degree program in Health Analytics. The 22/23 biennium funding would also be used to further the San Antonio Partnership for Precision Therapeutics. Loss or reduction in SALSI funding would hinder faculty hiring initiatives, expansion of academic programs and support of impactful research, as these programs are not built into both institution's permanent budget. This would affect UTSA and UT Health SA's ability to collaborate with the broader San Antonio biomedical community and will decrease both institutions competitiveness for federal programs and progress in advancing medical innovation in these areas.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Funding is needed on a permanent basis to invest in areas of growth, build and sustain capacity, better integrate services, and pursue strategic institutional goals.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

UTSA tracks number of students trained, joint research projectes funded, faculty engaged, scholarly works and publication, and invention disclosures/patents. In addition, we track resulting proposals and awards.

743 The University of Texas at San Antonio

San Antonio Partnership for Precision Therapeutics (SAPPT)

(1) Year Non-Formula Support Item First Funded:	2022
Year Non-Formula Support Item Established:	2022
Original Appropriation:	\$2,500,000

(2) Mission:

The San Antonio Partnership for Precision Therapeutics (SAPPT) has a goal to develop targeted therapeutics that takes into account the diversity of patient populations. Precision therapeutics gives clinicians treatment modalities that incorporates the complex biological and environmental mechanisms underlying a patient's health, disease, or condition, and to better predict which treatments will be most effective. By merging the resources of stellar academic and research institutions in San Antonio, the SAPPT integrates the complete drug development pathway from basic research, drug discovery and testing to clinical trials, to rapidly develop lifesaving solutions including to pandemic threats such as COVID-19. Leveraging the Vaccine Development Center of San Antonio, the SAPPT will expand its efforts beyond bench science to engage the community and lay the groundwork to tackle other emergent diseases in the future.

(3) (a) Major Accomplishments to Date:

Driven by a shared vision to leverage the robust scientific community and strengths of one of the fastest growing cities in America, the leaders of four prominent research entities united in 2018 in a groundbreaking collaboration. This powerful partnership aligns the unparalleled bioscience capabilities, resources and military medicine opportunities available in San Antonio to improve health care in Texas and beyond. Together, UT Health San Antonio, The University of Texas at San Antonio, Texas Biomedical Research Institute and Southwest Research Institute will advance innovative and high-impact biomedical research in precision therapeutics. Partnering also with UT Health San Antonio's Military Health Institute, the novel work is among the nation's most pioneering collaborations in research. SAPPT has been funded to date by the four partnering organizations. This support would expand this organizations reach and will allow for dedicated resources and investments to focus on the current pandemic event and to prepare for others of concern within the scientific community.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The four institutions in this consortium will engage graduate students, faculty members and scientists to deepen the understanding of human disease, specifically focused on the diverse populations of San Antonio and South Texas and develop novel therapeutics and vaccines. The goal of SAPPT is to further delineate the effects of genomics coupled with patient-specific factors on drug responses, allowing for optimal clinical outcomes.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

The four partnering institutions commits \$200,000 each in support of the SAPPT. This supports both administrative and scientific work. SAPPT's capacity would be greatly expanded with this special item funding.

(5) Formula Funding:

N/A

(6) Category:

Research Support

743 The University of Texas at San Antonio

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

The SAPPT operates on an annual budget of \$800,000 that is committed by UTSA, UT Health SA, Texas Biomedical Research Institute and the Southwest Research Institute (\$200,000 each). These funds cover both administrative and scientific work, which limits the consortium's ability to dedicate funding solely on pandemic related research.

(9) Impact of Not Funding:

SAPPT aims to support our nation in preparation for future pandemic events, which prove to be the greatest threat to humanity. This requires dedicated investments at the federal, state and private-sector level. This investment will strengthen the competitiveness and responsiveness of Texas in support of the current pandemic situation and future events.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

743 The University of Texas at San Antonio

Small Business Development Center (SBDC)

(1) Year Non-Formula Support Item First Funded:	1990
Year Non-Formula Support Item Established:	1990
Original Appropriation:	\$200,000

(2) Mission:

The mission of the South-West Texas Border Small Business Development Center Network (SBDC) is to promote small business and community economic development through extension services covering 79-county South-West Texas Border region, in cooperation with U.S. Small Business Administration and UTSA as regional administrator of the SBDC program. The SBDCs promote the growth, expansion, innovation, increased productivity, and improved management for small business through activities of individual business advising and technical assistance, training seminars and workshops, advocacy, and research information. The SBDC involve students and faculty through structured service-learning and applied research activities to benefit small businesses through our public service mission. Specialty SBDCs promote international trade, technology commercialization, corporate and public contracting, and rural small business. The national Small Business Development Centers (SBDC) program was legislated via the Small Business Act of 1976 as a program of SBA. Leveraged federal funding involves cooperative agreements with Higher-ed. State governments play a vital role as key partners to efficiently and effectively leverage resources which complement the State's economic development efforts. The Texas SBDC Network comprised of four lead offices strategically located at Texas Tech University, UTSA, DCCCD, and UoH. Combined, manage over sixty field centers and many satellites in urban and rural Texas.

(3) (a) Major Accomplishments to Date:

The SBDC served 27,094 small business clients in 2019, and their resultant growth contributed incremental tax revenue of \$45 million, increased sales/contracts/exports by \$747 million. The SBDCs created 4,517 new jobs, retained 4,443 jobs, 566 business starts, access \$180 million in business growth financing/investment through a network of 10 SBDC field centers and 4 specialty centers established by UTSA and sub-recipients covering 79 counties. For every \$1 invested in the SBDC, a return of \$7.80 generated in state and federal tax revenue (ROI).

Specialty SBDCs promote international trade, technology commercialization, government contracting, rural community development, business development, and business recovery relating to COVID-19.

Currently, SBDCs are reacting to the immediate needs caused COVID-19. Additional resources would allow SBDCs to structure partnerships designed to increase small business awareness and approaches to ensure survival, resiliency, strategic business recovery planning and implementation efforts. The Texas SBDC Network served 49,030 small business clients in 2019, and their resultant growth contributed incremental tax revenue of \$148M, increased sales/contract/exports by \$2.3B. The Texas SBDCs created 16,538 new jobs, retained 11,319 jobs, and helped access \$804 M in business growth financing/investment throughout the State of Texas. For every \$1 invested in Texas SBDCs, a return of \$7.06 generated in state and federal tax revenue (ROI).

(3) (b) Major Accomplishments Expected During the Next 2 Years:

743 The University of Texas at San Antonio

Serve 60,000 small businesses with impacts generated via home-growing Texas businesses and jobs. SBDCs are a proven and efficient means of continued growth, expansion, innovation, increased productivity and improved management for small businesses. These continued activities across the SBDC region result in improved performance of small business clients, greater economic growth, and full participation by women and minority owned businesses, rural businesses, contractors, export businesses, and veteran owned businesses. COVID-19 caused unprecedented damage to all small businesses throughout Texas and the U.S. COVID-19 has negatively affected Texas's small businesses with loss of revenue, employees, operations and many closures. The SBDC will address the special disaster recovery needs of small businesses by providing specialized services such as accessing and applying for COVID-19 disaster loans, protecting workplace employees and customers against health and safety threats, and exploring new markets. Assist small businesses to understand and prepare for potential effects of sudden natural or manmade disaster regarding supply chains, operations, finances, payrolls, distribution and sale of products. Assist small businesses to develop robust web integration, online sales and marketing, and cybersecurity protection. SBDCs will not have the adequate funding resources to assist the thousands of small businesses facing the 3-5 year challenge to recovery.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None

(5) Formula Funding:

None

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Primarily federal grants over the biennium FY 20 and FY21 from U.S. Small Business Administration and some user fees for training activities.

(9) Impact of Not Funding:

The economic growth and recovery from COVID-19 results by SBDCs for the Texas economy and our small businesses commensurately reduced. There would be a loss of federal funds available to support business development extension-services in the 79-county South- West Texas Border Region. Reduced client services, staff position terminations and student learning activities affected commensurately with funding reductions or loss. Many small businesses not able to take advantage of no-cost business advising that prepares them for survival, access capital for growth that consequently contribute to the State of Texas economy in terms of tax revenue. This would affect all the higher-education SBDC service center host-institutions as sub-recipients of UTSA.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Continued support will help small business development efforts across the state which in turn increase overall revenues to the state.

743 The University of Texas at San Antonio

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

The number of small businesses assisted. Small businesses served is a key performance metric ensuring service coverage throughout the Central, South and West Texas 79-counties served.

743 The University of Texas at San Antonio

South-West Texas Border Network SBDC (Rural Initiative)

(1) Year Non-Formula Support Item First Funded:	2010
Year Non-Formula Support Item Established:	2010
Original Appropriation:	\$1,213,169

(2) Mission:

The mission of the SBDC Rural Business program (RBP) is to increase the competitiveness of rural communities in the South- West Texas Border region by promoting small business economic activity and investment where corporate expansions and State incentives such as the Texas Enterprise Fund are rarely accessible options , so home-growing Texas business becomes essential. The RBP assists rural communities with business development projects, strategic planning and resource development, local capacity building, implementation of rural infrastructure, as well as SBDC individualized business assistance to access capital and expand market reach, such as export and contracting opportunities. The RBP convenes an annual statewide rural development conference supported by the Governor’s office of Economic Development and Tourism, Texas Department of Agriculture, U.S. Small Business Administration, U.S. Department of Agriculture, the Texas Workforce Commission and many economic development organizations and rural communities. The “Texas Rural Challenge” helps identify new markets for traditional products, sector diversification, business development and infrastructure, and growth strategies.

(3) (a) Major Accomplishments to Date:

In 2019, the Rural Initiative (RBP) provided small business advising and training in the 43 most rural counties within the 79 county coverage of the South- West Texas SBDC Network. The RBP served 858 small business clients accessed \$29M in loans, creating and retaining 839 jobs. The RBP small business clients consequently generated incremental sales of \$6M in local, state, and federal contracts, \$5.5M in exports, and \$13M general sales. There were 4,273 small business training attendees learning to start, manage, and grow a rural small business. The RBP addressing COVID-19 caused unprecedented damage to all small businesses throughout Texas negatively affecting Texas’s small businesses with loss of revenue, employees, operations and many closures. The RBP has convened an annual statewide rural development conference since 2010, the “Texas Rural Challenge”. The conference focus looks at current challenges and opportunities that affect rural Texas including: business and economic development, health care, the digital divide, tourism, environmental resilience, youth in rural communities, water resource management, and sustainable growth. UTSA School of Architecture faculty and students have also been engaged to assist rural communities prepare comprehensive strategic and land-use plans.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The RBP will serve 900 small business clients generating economic impact: access \$35M in loans, create and retain 900 jobs; incremental sales of \$10M in local, state, and federal contracts, \$7M in exports, \$15M general sales; 4,000 small business training attendees each year of the biennium. The RBP will convene an annual statewide rural development conference each year of the biennium, the “Texas Rural Challenge”. UTSA School of Public Policy in partnership with Shell Oil Company continue the Municipal Capacity Building Program providing governance training and municipal project engagement to rural communities. The SBDC will address the special disaster recovery needs of small businesses by providing specialized services such as accessing and applying for COVID-19 disaster loans, protecting workplace employees and customers against health and safety threats, and exploring new markets. UTSA School of Public Policy in partnership with Shell Oil Company have developed a Municipal Capacity Building Program that provides governance training and municipal project engagement. Forced cancellation of the planned 2020 Texas Rural Challenge creates an even greater need to convene and educate rural community leaders in 2022-23.

743 The University of Texas at San Antonio

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

No dedicated funding existed to extend SBDC services to rural communities beyond the 10 main SBDC service locations in larger cities.

(5) Formula Funding:

N/A

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

None

(9) Impact of Not Funding:

Many Texas small businesses and rural communities often lack the economic development capacity and technical assistance, information and, resources that the RBP offers in a hands-on way. Funding for 2022 and 2023 will sustain and expand positive economic impact to many neglected areas of the state, and help rural Texas businesses and communities achieve greater success to grow jobs and investment for their communities. The economic growth results of SBDCs for the Texas economy, rural communities and small businesses commensurately reduced. Rural communities and businesses would not have the same access to small business development services as the larger Texas cities. State economic development funding investments from the Texas Enterprise Fund and other state incentives are predominantly applicable to larger cities and academic research centers, so a less balanced approach to support rural community economic development would result if this Item funding eliminated or reduced.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Funding needed on an on-going basis to support rural counties with economic benefit as a result of small business and community economic impact generated.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

Performance metrics: Rural communities and small businesses served. The number of rural communities and small businesses served are key performance indicators and tracked monthly.

743 The University of Texas at San Antonio

Texas Demographic Center

(1) Year Non-Formula Support Item First Funded:	2006
Year Non-Formula Support Item Established:	2006
Original Appropriation:	\$327,398

(2) Mission:

To make demographic, economic and related data readily available and accessible to Texas legislators, State agencies, the public and private sectors. Produced and disseminate annual population estimates for counties and places in Texas and produce and disseminate biennial projections of the population by age, sex and race/ethnicity for Texas and counties in Texas. These estimates and projections are used by Texas state agencies, the Texas Legislature, and private sector concerns for personnel, facility and budgetary planning, and to provide expert analysis and interpretations of demographic and related trends impacting Texas.

(3) (a) Major Accomplishments to Date:

Texas Demographic Center has produced population estimates every year this decade and population projections every other year this decade in a timely manner and have made substantial improvements in the data sources used and methods for production and review. Provided invited testimony to a range of Texas House and Senate committees. Collaborated with the Secretary of State's Office and multiple other state and local level organizations to promote participation in the 2020 decennial Census. Participated in the Census Bureau efforts to improve their address file (for conducting the Census) that included the Local Update of Census Addresses (LUCA) and the Address Count Review program (identifying many thousands of addresses the Census Bureau did not have). Delivered in the range of 100 presentations per year to a range of audiences (professional associations, conferences, local civic organizations, legislative committees, etc.) on requested demographic topics.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Work with House and Senate Redistricting Committees and the Texas Legislative Council to complete the process of receiving public input and defining legislative boundaries. Produce new population projections using 2020 Census data as the base. Evaluate population estimates and population projections from last year using data from the 2020 Census. Employ results from evaluation to improve population estimates and projections. Expand efforts to disseminate demographic data using the internet. Further develop data visualization for the internet to assist with data dissemination and consumption of 2020 Census demographic data for broader audiences.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

This item includes an increment for activities previously funded through an interagency agreement with the Texas Legislative Council though there has always been a core of special item funding.

(5) Formula Funding:

None

(6) Category:

Public Service

743 The University of Texas at San Antonio

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

None

(9) Impact of Not Funding:

There will not be an organization producing population estimates for the State, counties, and places(cities) with demographic detail (age, race, sex) or producing population projections for the State and for counties with demographic detail. These estimates and projections are utilized by the Governor's Office, the Texas House and Senate (the Texas Legislative Council) and by state agencies (Water Development Board, TxDOT, TEA, THECB, TWC, HHSC, among others) for planning purposes and for operational purposes. Additionally, many counties, cities, and corporations utilize data produced by the Texas Demographic Center (TDC) for planning and operational purposes. TDC staff also consult with state agencies, counties, cities, corporations and other organizations about how to access and interpret demographic data TDC produces and disseminates. TDC serves as the Texas liaison to the U.S. Census Bureau and in addition to disseminating Census Bureau data, TDC provides data to the Census Bureau to help improve the conduct of the Census and other Census Bureau data collection efforts (resulting in better/more accurate demographic and economic data for Texas).

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

The Texas Demographic Center has been continuously funded at UTSA since 2006 and had been funded at Texas A&M prior to that. Existence of the TDC is contingent on continued funding.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

The Texas Demographic Center produces population estimates for the State every year (for the State, counties, places [cities] by age, sex, and race ethnicity). Production and dissemination via the internet is one metric (we also are able to track the number of downloads from our website). The Texas Demographic Center also produces population projections for the State every two years (except during a Census year) (for the State and counties by age, sex, and race/ethnicity). Production and dissemination of the population projections is another metric (similarly, we are able to track the number of downloads).

743 The University of Texas at San Antonio

Texas Pre-Engineering Program (TexPREP)

(1) Year Non-Formula Support Item First Funded:	1990
Year Non-Formula Support Item Established:	1990
Original Appropriation:	\$150,000

(2) Mission:

The Prefreshman Engineering Program is a pre-college program that prepares middle and high school students for success in post-secondary education by training practioners to deliver an innovative curriculum and engaging scholars in cutting-edge research to create evidence-based STEM programming.

(3) (a) Major Accomplishments to Date:

Founded in 1979, the Prefreshman Engineering Program has served over 40,000 participants, providing a rigorous summer learning experience and exposure to STEM education and careers. While the program initially hosted sites exclusively in San Antonio, during the 1990s the program expanded throughout the state of Texas and eventually to other areas of the country. Since 1993, the Texas Education Agency has authorized participating school districts to give PREP participants one Career and Technical Education (CTE) Innovative Coursework credit toward high school graduation for every year they participate and pass their PREP coursework. PREP continues to maintain its TEA status by updating its curriculum to include project-based learning and systems thinking. Of students participating in PREP, 80% have been members of minority groups with 53% being female. Based on a 2013 study, 81% of participants attend college, 52% of college attendees graduate, and 44% pursue STEM majors. Additionally, 67% of those STEM graduates are traditionally underrepresented in those fields, with nearly 48% being female.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

To increase the number of participants pursuing higher education and STEM degrees, PREP will: 1) Continue statewide and national program expansion, collaborating with current sites to increase capacity and working with new communities and institutions to establish new sites in underserved areas. 2) Develop and implement online modes of curriculum delivery, offering a hybrid online and in-person program format, and ultimately offering a fully online format to improve accessibility in regions where this type of program is not more readily accessible or economically prudent to implement. 3) Broaden curriculum; utilizing the current STEM model as a base, PREP will research, develop, and implement pre-college programming that includes additional academic disciplines and professions, possibly liberal and fine arts, legal and medical professions, and education.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Texas Higher Education Coordinating Board

(5) Formula Funding:

N/A

(6) Category:

Instructional Support

743 The University of Texas at San Antonio

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

This program is funded by different sources of funding; local government funds (\$54,885); private foundation funding (\$25,000); gifts from individual contributors and donations (\$200,317); independent school district payment of tuition (\$170,800); student tuition (\$144,900). The In-kind contributions that the program received in previous years as well as some of the local funding from some of our partner colleges and universities at this point is uncertain due to the COVID-19 pandemic. The use of these funds are broken down as follow: staffing, travel for student trips, classroom materials for students, meals for students, supplies for instructors, technology needed for delivery of services, recruiting; as well as online instruction, office materials, staff trainings, curriculum development and closing ceremonies.

(9) Impact of Not Funding:

PREP provides large-scale, high quality student programming while offering secondary teachers and post-secondary instructors experience refining and updating their pedagogical skills. Additionally, PREP partners with academic faculty across the state and country to study and implement programming based on research outcomes. To eliminate funding to this program means students will lose the opportunity to learn in a way that will help them pursue and complete a college degree, teachers will lose an opportunity to become more effective in the classroom, and research to develop and improve programs like this will disappear. Because these funds support the PREP Central Office operation, without support the program would end.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Continued, permanent support will sustain and expand this program as a resource for middle and high school students considering and planning for their higher education options.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A
