

University Curriculum Committee Report (Chair: Alistair Welchman)
Dec. Meeting of the Faculty Senate

There is one issue before the committee for the month of January 2016

A proposed minor in Sport Management for Bachelors of Business Administration (BBA) majors from the College of Business

Minor in Sport Management

Sport Management is the most popular component of the BBA in Sport, Event and Tourism Management, so this minor will solidify existing interest into a concrete qualification. Students take three required courses, including MGT 3013 (Introduction to Organization Theory, Behavior and Management) and three electives from a short menu of courses including an Internship. Students will only have to take four extra courses, since MGT 3013 is required for all business majors and SET 4943 (Internship) can count towards business majors. All the classes are already being taught in the College of Business (although the UCC notes that SET 3543 Sport Economics is different from, although a specialization of, the existing SET 3543 Economics of Tourism and Leisure) and no new resources will be needed.

The proposal has been recommended for approval at the college level. The UCC voted unanimously (8 for, none against, 1 abstention) to recommend that the Senate approve the proposal too.
