

# Financial Information Systems

## What We Do

### Financial Systems

- Support Financial Affairs departmental staff in the identification and resolution of issues with core business processes
- Request and monitor technical improvements that require development programming resources
- Conduct and/or coordinate testing of system improvements
- Facilitate resolution of functional enhancements, modifications and business process changes in partnership with Shared Information Services (UT System) and Business Information Systems core functional area

### Financial Reporting and Website Management

- Create report specifications and develop such specified reports for Financial Affairs departments
- Design, develop and maintain the Financial Affairs website

*Financial Information Systems supports Financial Affairs departmental staff in the identification and resolution of issues with core business processes*
