Biogeochemistry of arsenic in groundwater flow systems

Dr. Johannesson's research interests include low-temperature aqueous geochemistry and biogeochemistry, emphasizing trace element speciation, chemical hydrogeology, and biogeochemical cycling of trace elements (e.g., arsenic, selenium, and REEs) in the environment.

Date: Friday March 11th, 2022
Time: 4:00 – 4:50 PM
Zoom Meeting ID: 966-0591-8934
