### For studio classes:

- Currently, masks are suggested to be worn while in the buildings and studios, particularly in close proximity to others.
- Students are asked to respect everyone's personal space; keep a safe 6ft distance from peers and instructors.
- All studio classes will be limited, and enrollment capacity firmly set to allow for the proper distancing between workspaces and students.
- Open studio times are limited; a few studios areas will have limited studio practice or open studio times available. Please check with the department or your instructor.
- Please limit the number of outside supplies and tools you bring to class with you and bring in only essential items.
- Follow protocols specific to each studio/classroom space.
- And if you feel sick, please stay home, and inform your instructor or the registration office.
- Continued access to classes, studios and buildings is dependent upon following these guidelines as well as other protocols set forth for each studio and for students.

**9604 | Woodworking: Hand Plane Fundamentals | Robert Balfour**

NOTE: Taught off-site | Old School Makerspace | 2659 Eisenhower Road

*Instructor's Note about Tools: Below are all of the tools that would be helpful to have for basic hand plane woodworking. I have divided the list into required and recommended to try to help keep the cost of tools down. You can expect to spend about \$200 on the required tools. I highly recommend purchasing a plane(s) from one of the following makers: Bench Dog, Wood River, Lee Valley (Veritas), or Lie Nielsen. Cheaper planes are usually more work than they are worth. If the cost of the required tools is too much, you can email the instructor (see email below) to arrange to borrow one of his hand planes for the class.*

**Required Tools:**

- 1 [Bench Plane \(#3, #4, or #5\)](#)
- Square (6" or 12" Combination Square Recommended)

**Recommended Tools:**

- [Wheel Marking Gauge](#)
- [Winding Sticks](#)
- [Block Plane](#)

**Students will learn to:**

- Cut and laminate hardwoods to make a small cutting board.
- Choose the proper hand plane for a given task.
- Sharpen plane irons and tune hand planes for various operations.
- Dimension a board on six sides to ensure that it is flat and square.
- Use a hand plane to put a decorative edge around a board.

**Class Preparation:**

- 1) Come to class with comfortable clothing and closed toe shoes.
- 2) Bring the recommended tools for a richer learning experience.
- 3) Email the instructor at [revivalwoodcraft@gmail.com](mailto:revivalwoodcraft@gmail.com) with any questions or concerns.
