

DRS Seminars - Spring 2023

Month	Day	Host	Speaker	Institution	Talk title
January	23		Faculty Candidate		
January	30		Dr. Jianhua Ruan	UTSA	Network-based methods for bridging knowledge discovery and predictions from omics data
February	6		- Dr. Yuyan Cheng		
February	13	Parul Varma	Navneet Matharu	UCSF	Modulating gene regulation to treat genetic disorders
February	20	Alice Bertero	Dr Qiaojie Xiong	Stony Brook University	Microglia modulate stable wakefulness
February	27	Brian Hermann	Richard Behringer	MD Anderson Cancer Center	Developmental Genetic Regulation of Mammalian Sex Development
March	6	Stephanie Villalon	Sara Brownell	Arizona State University	is represented, what factors influence revealing concealable identities, and how does revealing affect students?
March	20	John McCarrey	Michael Skinner	Washington State University	Environmental Impacts on Epigenetic Transgenerational Inheritance: Generational Toxicology and Disease Etiology
March	27	Jenny Hsieh	Lu Sun	UT Southwestern Medical Center	How is myelination controlled in space and time?
April	3	Vanesa Nieto Estevez	Gemma Carvill	Northwestern University	transcription factors and chromatin remodelers in the pediatric epilepsies
April	10	Alexey Soshnev	Richard Phillips	University of Pennsylvania	Deciphering aberrant epigenetic silencing in midline gliomas
April	17	McCarrey	Bruce Blumberg	University of California, Irvine	How Does Prenatal Obesogen Exposure Lead to a Transgenerational Predisposition to Obesity?
April	24	Lacy Barton	Pamela Geyer	University of Iowa	Disease variants of Barrier-to-autointegration factor alter nuclear structure and genome stability
May	1	Brian Hermann	Corinna Ross	Institute & Southwest National Primate Research	Marmosets as models for health and aging
