The University of Texas at San Antonio Campus Master Plan

Discovery Survey Results
Introduction | Discovery Survey

The Discovery Survey is an interactive online engagement tool that was offered to all students, faculty, and staff on both campuses during the early analysis stage of the master plan process.

The survey offers an opportunity for users to answer questions and utilize maps to depict how they experience the University’s campuses. These answers provide the master plan team with broad insights into the preferences, use patterns, and unique characteristics specific to the institution.
