

AirRowdy_Guest Connection Instructions for Windows

1. Click the Wi-Fi icon on the taskbar or navigate to your device's network settings.

2. Ensure Wi-Fi is enabled, confirm that the Wi-Fi toggle is switched on so your device can detect nearby networks.

3. Locate AirRowdy_Guest. In the list of available networks, find and click on AirRowdy_Guest. It should appear among other local options.

4. Select the Network, click once to highlight AirRowdy_Guest. You'll see a message noting that it's an open network.

5. Optional: Connect Automatically

Check the box labeled Connect automatically if you want your device to join this network whenever it's in range.

6. Click 'Connect' and hit the Connect button to initiate connection.

7. The captive portal will load in a web browser, requiring you to accept the terms and conditions, place a checkmark in the box, and press the 'Sign In' button
