## THE APA DOCUMENTATION BASICS

### What Is APA Style?

APA is a writing style based upon the Publication Manual of the American Psychological Association, used most commonly in the social sciences, especially in Psychology and Education. In brief, APA dictates the format and citation method of a particular text.

### Why Do We Do It?

As a professional, it is important to cite all information that is not your work. APA emphasizes the author and date of a publication. In social sciences, it is particularly important to find current research, unless you are making a point otherwise.

### General Instructions for your APA Paper

- Type (12-pt Times New Roman)
- Margins (1 in. all sides)
- Double spaced

### Header (Running head)

Fully justified and includes the following: Running head: LESS THAN 50 CHARACTERS COUNTING SPACES & the page number. "Running head:" appears only on the first page of your paper:

- Running head: 50 CHARACTERS ALL CAPS 1
- 50 CHARACTERS ALL CAPS 2

### Title Page

Include your header and the following, centered and double spaced:

- Title
- Name
- Institutional Affiliation

### Headings (5 levels)

Follow a top-down progression. Note the capitalization and periods.

#### Centered Bold

#### Flush Left

- Indented once.**
- Indented italics.***
- Indented, no bold, italics.*

### APA is Your Best Friend

#### REMEMBER:

**Numbers:** APA loves numerals since it is research based. Use numerals to express all numbers except,

Numbers below 10

Any number that begins a sentence or title (Three blind mice were talking...)

Common fractions (one-fourth, one-third)

Universally accepted usage (the Ten Commandments)

#### Percentages:

Use % when preceded by a numeral.

Use *percentage* when there is no number, except in tables and figures.

## WHAT SHOULD YOU DO...

**Avoid over quoting.** Although it is important to be able to support your own work with the research of others, your work should primarily be your own. Especially limit block quotes. Remember to paraphrase & summarize more.

**Include your title on the first page.** Even though you have a title page, you still need a title centered on your first page of text.

**Avoid passive language** in most cases.

**Use valid, academic resources.**

**Avoid bias language.** Be aware of gender, race, sexuality, age, and ability prejudices.

**Use abbreviations sparingly.** Do not use Latin abbreviations, other than in parentheses.

**Use bold font** only for some headings.

**Use italics** for emphasis or linguistic examples, but only the first time.

**Use TWO spaces after a period,** not one.

**Use colons**

**between a complete introductory clause and a final phrase.** Do not use after an introduction that is not a complete sentence.

- I explain the following: quoting and paraphrasing.

- The formula is  $r = e + a$ . (correct)

- The formula is:  $r = e + a$ . (incorrect).

**Proof read your paper** thoroughly.

Spell check does not catch

## Q U O T A T I O N S   I N   T E X T

**Display quotation of fewer than 40 words in double quotation marks. Include page number in parentheses.**

- Black (1993) stated, "The 'placebo effect' ... disappeared when behaviors were studied in this manner" (p. 276).

**Display quotation of 40 or more words in block quotation (double spaced) without quotation marks.**

- Black (1993) found the following:

The "placebo effect" had been verified in previous studies. This effect was found to be indicative of a patient's belief that they were suffering from x diagnosis and were receiving y medication which was helping them to reduce z psychosomatic side effects. (p. 276)

**Omitting material**

- Insert ... where you omitted material

**Inserting material**

- Use brackets [ ] around what you insert

**Adding emphasis**

- Use brackets to explain [emphasis added]

**Direct quotations MUST include:**

- Author, year, and page number.
